Lesson
(61)

Money

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Compare Egyptian banknotes (1, 5, 10, 20, 50, 100, and 200 LE).
- Estimate monetary value of various items.

Remember

The Egyptian Pound

1 pound

5 pounds

10 pounds

20 pounds

50 pounds

100 pounds

200 pounds

AL-Baher - Primary (2) Second Term

7

هذا العمل خاص بموقع ذاكرولى التعليمى ولا يسمح بتداوله على مواقع أخرى

Activities

1 Match the equal amounts:

L.E 1

L.E 10

L.E 5

L.E 200

L.E 100

L.E 20

L.E 50

2

Write the value of each banknote:

LE

LE

LE

LE

LE

LE

LE

AL-Baher - Primary (2) Second Term

9

Lesson
(62)

Money

2

Outcomes

Students will:

- Participate in Calendar Math activities.
- Combine 1, 5, 10, 20, 50, 100, and 200 LE notes to create a given total.
- Discuss different ways to combine banknotes to create a given total.

Samir went to the store to purchase some fruit.

The fruit cost LE 5. He had LE 6 (notes).

How could Samir pay for his fruit?

We can add different banknotes together to come up with LE 5.

When we have a **larger amount**, we can decompose it into a set of smaller amounts.

Activities

1

Match the suitable amounts:

2

Write the amount of each group:

LE

LE

LE

12

Math / Chapter (1) - Lesson (62)

3

Compare using ($>$, $<$, $=$):

4

Circle the notes to get the given amount:

LE 50

LE 20

LE 100

LE 200

14

Math / Chapter (1) - Lesson (62)

Lesson
(63)

Money 3

Outcomes

Students will:

- Participate in Calendar Math activities.
- Combine 1, 5, 10, 20, 50, 100, and 200 LE notes to create a given total.
- Decompose large denominations of money into smaller denominations.

Combine

Decompose

Note

Decomposing a number means to break up a bigger number into a set of smaller numbers. In money it means to break large amounts into small amounts.

Example: Combine banknotes to make LE 24:

$$\begin{aligned}
 \text{LE}24 &= \text{LE } 20 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 \\
 &= \text{LE } 10 + \text{LE } 10 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 \\
 &= \text{LE } 10 + \text{LE } 5 + \text{LE } 5 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 \\
 &= \text{LE } 5 + \text{LE } 5 + \text{LE } 5 + \text{LE } 5 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1 + \text{LE } 1
 \end{aligned}$$

Try again

Combine banknotes to make LE 32.

LE 32=

Activities

1

Match the equal amounts:

LE 42

LE 20, LE 20, LE 5, LE 5,
LE 1, LE 1, LE 1, LE 1

LE 31

LE 50, LE 10, LE 5,
LE 1, LE 1

LE 54

LE 5, LE 5, LE 5, LE 5, LE 5,
LE 1, LE 1, LE 1, LE 1

LE 29

LE 10, LE 10, LE 10,
LE 5, LE 5, LE 1, LE 1

LE 67

LE 50, LE 10, LE 10,
LE 1, LE 1, LE 1, LE 1

LE 53

LE 10, LE 10, LE 5,
LE 5, LE 1

LE 74

LE 20, LE 20, LE 10,
LE 1, LE 1, LE 1

16

Math / Chapter (1) - Lesson (63)

2

Fill in the blanks to get the exact amounts:

LE 43 =	LE 20	LE 10	LE 10	LE 1	LE 1	LE 1
LE 56 =	LE 20	LE 20	
LE 74 =	LE 50	LE 10
LE 46 =	LE 10	LE 10
LE 108 =	LE 50	LE 20	LE 20
LE 462 =	LE 100	LE 100	LE 100
LE 167 =	LE 50	LE 50
LE 500 =	LE 200	LE 100	LE 50

3 Draw simple banknotes equal to the price of each item:

1 5 10 20 50 100 200

Example:

1

20

10

1

20

5

4

Color the banknotes equal to the price:

LE 510	200	200	100	100	10	5	1	1
LE 470	200	200	100	100	100	50	10	10
LE 270	200	200	100	50	10	10	1	1
LE 70	200	200	100	50	10	10	5	1
LE 110	200	200	100	100	10	5	1	1
LE 660	200	200	100	100	100	50	10	1
LE 76	20	20	10	10	10	5	1	1
LE 45	20	20	10	10	5	1	1	1
LE 125	50	50	50	20	10	5	1	1
LE 263	200	100	100	50	10	1	1	1
LE 176	200	100	50	10	10	5	1	1

Lesson (64)

Money

4

Counting and adding banknotes

Outcomes

Students will:

- Participate in Calendar Math activities.
- Combine 1, 5, 10, 20, 50, 100, and 200 LE notes to create a given total.
- Identify different ways to combine banknotes to create a given total.

Activities

1

Find the sum:

$$10 + 3 = \dots\dots\dots$$

$$20 + 5 = \dots\dots\dots$$

$$30 + 40 = \dots\dots\dots$$

$$10 + 7 = \dots\dots\dots$$

$$30 + 9 = \dots\dots\dots$$

$$50 + 30 = \dots\dots\dots$$

$$10 + 8 = \dots\dots\dots$$

$$40 + 6 = \dots\dots\dots$$

$$60 + 5 = \dots\dots\dots$$

$$20 + 30 + 20 = \dots\dots\dots$$

$$70 + 10 + 2 = \dots\dots\dots$$

$$60 + 10 + 10 = \dots\dots\dots$$

$$60 + 20 + 8 = \dots\dots\dots$$

$$20 + 30 + 20 = \dots\dots\dots$$

$$50 + 20 + 3 + 5 = \dots\dots\dots$$

$$60 + 10 + 20 + 9 = \dots\dots\dots$$

$$40 + 30 + 3 + 5 = \dots\dots\dots$$

$$10 + 20 + 4 + 30 = \dots\dots\dots$$

2

Write the total amount of each group:

3 Match the equal amount:

LE 100 LE 50 LE 5 LE 1

LE 10 LE 10 LE 10 LE 10

LE 1 LE 1

LE 100 LE 50 LE 10 LE 5

LE 1 LE 1 LE 1

LE 20 LE 20 LE 5

4

Write the total amounts:

LE 50	LE 10	LE 1	LE 1	LE 1	= LE 63
LE 20	LE 20	LE 10	LE 10	LE 1	=
LE 20	LE 10	LE 10	LE 5		=
LE 1	LE 1	LE 1	LE 1		=
LE 10	LE 10	LE 1			=
LE 10	LE 10	LE 5			=
LE 100	LE 20				=
LE 50	LE 30				=

5 Add the money. Match each total to the suitable price on the right:

LE 100	LE 20	LE 10	LE 1
LE 1	LE 1	LE 1	

LE146

LE 100	LE 20	LE 10	LE 10
LE 5	LE 1		

LE54

LE 100	LE 50	LE 10	LE 1
LE 1	LE 1		

LE163

LE 50	LE 20	LE 5
-------	-------	------

LE134

LE 50	LE 1	LE 1	LE 1
LE 1			

LE75

Lesson (65)

Adding 2-digit and 3-digit numbers without regrouping

Outcomes

Students will:

- Participate in Calendar Math activities.
- Combine (1, 5, 10, 20, 50 and 100) LE notes to create a given total.
- Identify different ways to combine banknotes to create a given total.
- Add 2-digit and 3-digit numbers without regrouping.

Activities

1

Add:

$$\begin{array}{r} 34 \\ + \\ 53 \\ \hline \end{array}$$

$$\begin{array}{r} 62 \\ + \\ 24 \\ \hline \end{array}$$

$$\begin{array}{r} 73 \\ + \\ 25 \\ \hline \end{array}$$

$$\begin{array}{r} 56 \\ + \\ 43 \\ \hline \end{array}$$

$$\begin{array}{r} 432 \\ + \\ 54 \\ \hline \end{array}$$

$$\begin{array}{r} 653 \\ + \\ 26 \\ \hline \end{array}$$

$$\begin{array}{r} 463 \\ + \\ 26 \\ \hline \end{array}$$

$$\begin{array}{r} 924 \\ + \\ 23 \\ \hline \end{array}$$

2 Add:

تابع جديد ذاكرولى على موقعنا
<https://www.zakrooly.com>

$$42 + 53 = 95$$

$$246 + 23 = \dots\dots\dots$$

$$53 + 21 = \dots\dots\dots$$

$$632 + 324 = \dots\dots\dots$$

$$42 + 57 = \dots\dots\dots$$

$$502 + 130 = \dots\dots\dots$$

$$143 + 52 = \dots\dots\dots$$

$$400 + 523 = \dots\dots\dots$$

$$125 + 73 = \dots\dots\dots$$

$$821 + 168 = \dots\dots\dots$$

3 You have only LE 50 to spend, tick (✓) as many items as you can without going over budget of LE 50:

☐

☐

☐

☐

☐

☐

4 Your budget is **LE 200**, tick (✓) as many items as you can without going over budget of **LE 200**:

☐

☐

☐

☐

☐

☐

5 Your budget is **LE 100**, tick (✓) as many items as you can without going over budget of **LE 100**:

☐

☐

☐

☐

☐

☐

Lesson (66)

Adding and subtracting 1

Outcomes

Students will:

- Participate in Calendar Math Activities
- Solve one-step story problems involving money.
- Add and subtract 2- and 3-digit numbers without regrouping.

Example: 1 Zaher has L.E 35 and his brother Hesham has L.E 42. How much money do they have all together?

The total amount =

$$\begin{array}{r} \text{L.E } 35 \\ + \\ \text{L.E } 42 \\ \hline \text{L.E } 77 \end{array}$$

Example: 2 Ali's father gave him L.E 45. Ali bought a book for L.E 23. How much money left with Ali?

Money left with Ali =

$$\begin{array}{r} \text{L.E } 45 \\ - \\ \text{L.E } 23 \\ \hline \text{L.E } 22 \end{array}$$

Activities

1 Solve the following problems:

- 1) Shaimaa was given **L.E 85** for her birthday. She bought a new pair of shoes for **L.E 65**. How many pounds does Shaimaa have now?

- 2) Shahd saved **L.E 42** in one week, the next week she saved **L.E 25**. How much money does Shahd have in all?

- 3) Soha was given **L.E 39** for buying something. She bought a basket of fruit for **L.E 16**. How many pounds left with Soha?

- 4) Wael had **24 pounds**, He bought a chocolate for **13 pounds**.
How much money does Wael have now?

L.E 13

- 5) Tamer bought a book for **L.E 55** and a new football for **L.E 44**.
How much did Tamer pay for all together?

L.E 55

L.E 44

- 6) Hany and his brother put their money together to buy a new ball. Hany had **L.E 45** and his brother had **L.E 54**.
How much money do they have all together?

- 7) Hend donated **LE 45** for Tahia Misr Box, her brother donated **LE 42**, too. How much money did they donate all together?

2

Answer the following questions:

MENU

L.E 20

L.E 17

L.E 14

L.E 40

L.E 24

L.E 5

1) Ahmed had **LE 100**. He ordered a piece of pizza. How much money remained?

2) Enjy ordered a burger and a can of Pepsi. How much money did she pay?

3) Hadi ordered an ice cream. Hadeer ordered French fries. How much money did they pay?

4) Which is more expensive, a burger and a can of Pepsi together or a pizza alone?

Lesson (67)

Adding and subtracting 2

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Apply place value concepts to add and subtract money.
- Describe their real-world experiences with money.

The place of a digit in a number tells its value.
In 465, we have 4 Hundreds, 6 Tens and 5 Ones

$$465 = 400 + 60 + 5$$

Hundreds	Tens	Ones

Place
value

Value

Hundreds	Tens	Ones
4	6	5
400	60	5

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

465

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

326

Activities

1

Write the total amount of money:

Hundreds	Tens	Ones

LE

Hundreds	Tens	Ones

LE

Hundreds	Tens	Ones

LE

Hundreds	Tens	Ones

LE

2

Complete the following money mat:

Place Value / Money Mat

	Hundreds LE 100	Tens LE 10	Ones LE 1
LE 423	4	2	3
LE 652
LE 729
LE 438
LE 609
LE 530
LE	6	8	9
LE	2	1	6
LE	4	5	3
LE	5	7	5
LE	5	6	8

3 Complete the (H / T / O) chart as the example:

1	5	10	20	50	100	200
---	---	----	----	----	-----	-----

Hundreds	Tens	Ones
100	10	1
100	10	1
100	10	1

LE 534

Hundreds	Tens	Ones

LE 231

Hundreds	Tens	Ones

LE 652

Hundreds	Tens	Ones

LE 354

Lesson (68)

Adding 2- and 3- digit numbers with regrouping

Outcomes

Students will:

- Participate in Calendar Math activities.
- Apply place value concepts to add money with regrouping.
- Add 2- and 3- digit numbers with regrouping.

Activities

1 Complete the table:

LE 14

LE 16

LE 10

LE 17

LE 19

LE 6

LE 15

LE 10	LE 1
1	4
.....
.....
.....
.....
.....
.....

2 Complete as the example:

LE 100	LE 10	LE 1		LE 100	LE 10	LE 1
5	6	17	→	5	7	7
3	6	14	→	3	7
5	8	18	→
3	4	12	→

3 Complete as the example:

LE 100	LE 10	LE 1		LE 100	LE 10	LE 1
4	13	5	→	5	3	5
6	12	7	→	7
8	17	3	→
6	15	2	→

Example: 1 Add LE 560 + LE 350

LE 100	LE 10	LE 1		LE 100	LE 10	LE 1
5	6	0		5	6	0
3	5	0	=	3	5	0
8	11	0	=	9	1	0
						910

Try yourself

Add LE 290 + LE 475

LE 100	LE 10	LE 1		LE 100	LE 10	LE 1
2	9	0		2	9	0
4	7	5	=	4	7	5
6	16	5	=
					

Example: ② Add LE 436 + LE 545

$$\begin{array}{r}
 +436 \\
 545 \\
 \hline
 11
 \end{array}
 \rightarrow
 \begin{array}{r}
 \overset{1}{+}436 \\
 545 \\
 \hline
 1
 \end{array}
 \rightarrow
 \begin{array}{r}
 \overset{1}{+}456 \\
 545 \\
 \hline
 81
 \end{array}
 \rightarrow
 \begin{array}{r}
 \overset{1}{+}436 \\
 545 \\
 \hline
 981
 \end{array}$$

 Remark

- 1) We should start addition from the ones place or from the right.
- 2) We can only write a digit up to 9 in any place, so we carry one to the next place if the sum of ones has 2 digits.

Example: ③ Add LE 563 + LE 370

$$\begin{array}{r}
 +563 \\
 370 \\
 \hline
 3
 \end{array}
 \rightarrow
 \begin{array}{r}
 +563 \\
 370 \\
 \hline
 133
 \end{array}
 \rightarrow
 \begin{array}{r}
 \overset{1}{+}563 \\
 370 \\
 \hline
 33
 \end{array}
 \rightarrow
 \begin{array}{r}
 \overset{1}{+}563 \\
 370 \\
 \hline
 933
 \end{array}$$

Lesson (69)

Subtracting 2- and 3-digit numbers with regrouping

Outcomes

Students will:

- Participate in Calendar Math activities.
- Apply place value concepts to subtract money with regrouping.
- Subtract 2- and 3-digit numbers with regrouping.

Subtract:

$$\begin{array}{r} \text{LE } 43 \\ - \text{LE } 21 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 56 \\ - \text{LE } 32 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 54 \\ - \text{LE } 33 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 643 \\ - \text{LE } 221 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 563 \\ - \text{LE } 321 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 763 \\ - \text{LE } 211 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 64 \\ - \text{LE } 11 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 42 \\ - \text{LE } 12 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \text{LE } 54 \\ - \text{LE } 10 \\ \hline \end{array}$$

.....

Learn how to subtract LE 27 from LE 45

We can't take 7 away from 5 or we don't have enough ones to subtract 7, so we'll take one of the LE 10 note and make it ten LE 1 note. We decompose one LE 10 note into ten LE 1 notes.

LE 10	LE 1
4	5
-	
2	7

LE 10	LE 1
3	15
-

$$\text{LE } 53 - \text{LE } 37 = \text{.....}$$

$$\text{LE } 72 - \text{LE } 36 = \text{.....}$$

$$\text{LE } 46 - \text{LE } 37 = \text{.....}$$

$$\text{LE } 65 - \text{LE } 27 = \text{.....}$$

$$\text{LE } 30 - \text{LE } 19 = \text{.....}$$

$$\text{LE } 83 - \text{LE } 46 = \text{.....}$$

$$\text{LE } 67 - \text{LE } 49 = \text{.....}$$

$$\text{LE } 60 - \text{LE } 37 = \text{.....}$$

$$\text{LE } 63 - \text{LE } 48 = \text{.....}$$

$$\text{LE } 60 - \text{LE } 55 = \text{.....}$$

$$\text{LE } 55 - \text{LE } 39 = \text{.....}$$

$$\text{LE } 72 - \text{LE } 15 = \text{.....}$$

Subtract and color then match:

AL-Baher - Primary (2) Second Term

45

Lesson (70)

Adding and subtracting 2-digit and 3-digit numbers with regrouping

Outcomes

Students will:

- Participate in Calendar Math activities.
- Apply place value concepts to solve story problems involving money.
- Add and subtract 2- and 3-digit numbers with regrouping.

1

نفوقه في أي عمل عليه العلامة دي

Nora went to the market and bought fruit, vegetables and eggs. She spent **LE 325** and she bought a toy for **LE 48**.

How much money did she spend in all?

The problem is addition problem

$$\begin{array}{r} 325 \\ + \\ 48 \\ \hline \end{array}$$

$$\text{LE } 373$$

2

Example:

Amir made **LE 940** working for a small company. He bought himself some new pants for **LE 370**.
How much money left with him?

The problem is subtraction problem

940

370

.....

Try yourself

Put (+) in front of the addition sum and (-) in front of the subtraction sum:

- 1) Ahmed bought a pen for **LE 10** and a notebook for **LE 5**. How much money did he pay? (.....)
- 2) Ahmed had **LE 20**. He gave his younger brother **LE 5**. How much money remains? (.....)

Activities

Answer the following questions:

- 1) Roby had LE 56 in her purse. Mona gave her LE 173. How much money does Roby have now?

.....

- 2) Mariam had LE 100, she gave her brother LE 50. How much money does Mariam have now?

.....

- 3) Ola had LE 170. She bought mangoes for LE 35. How much money left with her?

.....

- 4) Walaa has LE 360, and Hamza has LE 460. How much money do they have all together?

.....

- 5) Ahmed spent LE 153, Mahmoud spent LE 290. How much less money did Ahmed spend than Mahmoud?

.....

- 6) Hanan bought a toy with LE 59, and a book for LE 76. How much money did she pay all together?

.....

- 7) Somaya has LE 467 and Salma has LE 339. How much more money does Somaya have than Salma?

.....

- 8) Roshdy received LE 259 from his father on Friday and LE 372 from his uncle on Sunday.

How much money did he receive in total?

.....

Review on Chapter (1)

Write the equal amounts:

Math / Review on Chapter (1)

2

Look at the price , then answer the following questions:

- Color **two** things you can buy for **LE 150** in green.
- Color **two** things you can buy for **LE 60** in red.
- Color **two** things you can buy for **LE 140** in blue.
- Color **two** things you can buy for **LE 220** in yellow.
- If you want to buy a watch, T-shirt and a ball, how much money will you pay?

Amount = **LE** + **LE** + **LE** = **LE**

3 Complete:

Lesson (71)

Even / Odd numbers

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Determine whether a number is even or odd.

Even Number

shows pairs with no cubes left over.

Example: (2, 4, 6, 8, 10, 12,)

Example:

4

4 is even

6

6 is even

Odd Number

shows pairs with one cube left over.

Example: (3, 5, 7, 9, 11, 13,)

Example:

3

3 is odd

5

5 is odd

Activities

1 Write the number of cubes, then circle even or odd:

Number: - - - - -

(even – odd)

Number: - - - - -

(even – odd)

Number: - - - - -

(even – odd)

Number: - - - - -

(even – odd)

Number: - - - - -

(even – odd)

Number: - - - - -

(even – odd)

2 Circle even or odd:

4

(even - odd)

5

(even - odd)

8

(even - odd)

9

(even - odd)

11

(even - odd)

12

(even - odd)

17

(even - odd)

22

(even - odd)

3 Write even or odd:

8

()

6

()

7

()

10

()

25

()

5

()

21

()

16

()

4 Pick out the even numbers and write them in the balloons:

26, 12, 25, 14, 11, 33, 18, 100, 9, 20

5 Determine if the number is even or odd, and then record in the chart:

Even	Odd

6

Use the numbers in the box and complete:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100
101	102	103	104	105	106	107	108	109	110
111	112	113	114	115	116	117	118	119	120

a) Write all even numbers.

2, 4, 6

.....

.....

.....

b) Write all odd numbers. 1, 3, 5

.....

.....

7

Use the numbers in the box and complete:

a) The even numbers are and

b) The odd numbers are and

c) The two numbers that you can add together to get an even number are and

d) The two numbers that you can add together to get an odd number are and

Lesson (72)

Even / Odd numbers 2

Outcomes

Students will:

- Participate in Calendar Math activities.
- Describe a number as even or odd.
- Determine whether doubling a number results in an even or odd sum.

Using the chart, complete with even and odd numbers:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30

Even numbers

2, 4,,,,,,,,,,

Odd numbers

1, 3,,,,,,,,,,

0 - 2 - 4 - 6 - 8

Any number has (0, 2, 4, 6 or 8) in its ones place is an even number.

Examples

(10 - 12 - 14 - 16 - 18 - 20 - 22 - 24 - 26 - 28 - 30 - 32 - 34 - 36 - 38 - 40 - 42.....)

1 - 3 - 5 - 7 - 9

Any number has (1, 3, 5, 7 or 9) in its ones place is an odd number.

Examples (11 - 13 - 15 - 17 - 19 - 21 - 23 - 25 - 27 - 29 - 31 - 33 - 35)

Activities

1 Colour the shapes with even numbers in green and the odd numbers in yellow :

2 Write all the even numbers between:

- a) 46 and 58: (48 , 50 , 52 , 54 , 56)
- b) 83 and 93: (..... , , , ,)
- c) 51 and 61: (..... , , , ,)
- d) 29 and 39: (..... , , , ,)
- e) 37 and 47: (..... , , , ,)

3 Write all the odd numbers between:

- a) 66 and 76: (67 , 69 , 71 , 73 , 75)
- b) 72 and 82: (..... , , , ,)
- c) 48 and 58: (..... , , , ,)
- d) 34 and 44: (..... , , , ,)
- e) 22 and 32: (..... , , , ,)

4 Write any two odd numbers between:

11 and 20

(.....) (.....)

52 and 60

(.....) (.....)

61 and 70

(.....) (.....)

73 and 81

(.....) (.....)

Note

When we double even or odd number, we always get an even number.

5

Double each number and then determine if the sum is even or odd:

Number	Double	Even or Odd?
1	$1 + 1 = 2$	even
2	$2 + 2 = 4$	even
3 + =
4 + =
5 + =
6 + =
7 + =
8 + =
9 + =
10 + =

Lesson
(73)Even / Odd numbers **3**

Outcomes

Students will:

- Participate in Calendar Math activities.
- Find the sum of two numbers.
- Determine whether adding an even and an odd number results in an even or odd sum.

1

When we add an even number and an even number, we will get an even number.

Example:  +  = 

even + even = even

$$2 + 4 = 6$$

Complete the following table as the example:

Addition operation	Sum	Even or Odd
$6 + 4$	10	even
$8 + 4$		
$8 + 2$		
$4 + 12$		
$40 + 502$		
$236 + 432$		
$532 + 234$		

2 When we add an odd number and an odd number, we will get an even number.

Example:  +  = 
odd + odd = even
3 + 5 = 8

↪ Complete the following table:

Addition Operation	Sum	Even or Odd
3 + 9		
5 + 15		
7 + 9		

3 When we add an even number and an odd number, we will get an odd number.

Example:  +  = 
even + odd = odd
2 + 7 = 9

↪ Complete the following table:

Addition Operation	Sum	Even or Odd
4 + 3		
4 + 21		
24 + 35		

Activities

1 Without getting the sum, determine whether it is an even or odd number using the previous rule:

$5+6$

(even - odd)

$13+5$

(even - odd)

$14+6$

(even - odd)

$25+9$

(even - odd)

$43+16$

(even - odd)

$16+23$

(even - odd)

$54+63$

(even - odd)

$77+50$

(even - odd)

$632+337$

(even - odd)

$56+112$

(even - odd)

$79+100$

(even - odd)

$50+74$

(even - odd)

2 Choose the correct answer:

1 $4 + (5 \text{ or } 6)$ is an even number.

2 $16 + (150 \text{ or } 31)$ is an odd number.

3 $163 + (100 \text{ or } 209)$ is an even number.

4 even + (even or odd) is an even number.

3

Answer and color according to the sum (odd / even):

$$3 + 9 = 12$$

even / odd

$$10 + 4 = \dots\dots\dots$$

even / odd

$$5 + 6 = \dots\dots\dots$$

even / odd

$$7 + 3 = \dots\dots\dots$$

even / odd

$$11 + 12 = \dots\dots\dots$$

even / odd

$$12 + 14 = \dots\dots\dots$$

even / odd

4

Complete with a suitable number:

Lesson
(74)

Patterns 1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Identify the rule for a number pattern.
- Extend a number pattern two places.

Pattern

is a sequence of shapes or numbers with a regular form according to a specific rule.

Shape Patterns

Pattern

Rule

Activities

1 Colour the shapes as the same patterns:

2 Complete the patterns:

Number Patterns

1 Skip and make patterns (use 120 chart):

Skip by (2)

- 0 , 2 , 4 , , , ,
- 14 , 16 , , , ,
- 30 , 32 , , , ,
- 56 , 58 , , , ,

Skip by (5)

- 0 , 5 , 10 , , , ,
- 20 , 25 , , , ,
- 45 , 50 , , , ,

Skip by (10)

- 0 , 10 , 20 , , , ,
- 100 , 110 , , , ,

2

Complete the number pattern as the example:

Example:

الصف الثانى الابتدائى

3 Choose the suitable number to complete the pattern as the example:

2, 4, 6,

☒ 8 ☐ 15 ☐ 3

10, 20, 30,

☐ 50 ☐ 40 ☐ 5

13, 15, 17,

☐ 90 ☐ 19 ☐ 9

12, 14, 16,

☐ 13 ☐ 15 ☐ 18

3, 6, 9,

☐ 12 ☐ 5 ☐ 3

4, 8, 12,

☐ 14 ☐ 15 ☐ 16

5, 10, 15,

☐ 20 ☐ 16 ☐ 50

6, 12, 18,

☐ 8 ☐ 24 ☐ 19

Lesson (75)

Patterns 2

Outcomes

Students will:

- Participate in Calendar Math activities.
- Apply a rule to create a number pattern up to five places.
- Add or subtract to extend a pattern.

Increasing pattern

1, 2, 3, 4, , ,

The numbers in this pattern are getting bigger or increasing by (1)

The rule is: (to add 1 each time).

Notice

Decreasing pattern

12, 10, 8, 6, , ,

The numbers in this pattern are getting smaller or decreasing by (2).

The rule is: (to subtract 2 each time).

Learn

Number pattern can increase or decrease; we can have rules by adding or subtracting a certain amount each time.

Sometimes rules can include adding and subtracting.

Activities

1 Complete the number patterns:

a

	+3	+3			
3	6	9

Rule
adding
(3) each
time

b

50	55	60

Rule
adding
(5) each
time

c

90	80	70

Rule
subtracting
... each
time

d

85	75	65

Rule
subtracting
... each
time

AL-Baher - Primary (2) Second Term

75

2

Complete the following patterns:

a 3, 5, 7, 9,, Rule is (+2).

b 17, 20, 23, 26,, Rule is

c 73, 70, 67, 64,, Rule is

d 95, 85, 75, 65,, Rule is

e 46, 42, 38, 34,, Rule is

f 66, 70, 74, 78,, Rule is

g 8, 16, 24, 32,, Rule is

3

Complete the following patterns:

a 12, 10, 8,, Rule is (-2).

b 30, 25, 20,, Rule is

c 18, 15, 12,, Rule is

d 36, 30, 24,, Rule is

e 75, 80, 85,, Rule is

Lesson (76)

Patterns 3

Outcomes

Students will:

- Participate in Calendar Math activities.
- Match a rule to a number pattern.
- Extend number patterns using a given rule.
- Create a pattern rule and matching number pattern.

Activities

1

Circle the correct answer for each pattern:

a 5, 7, 9, 11, 13, 15 (increasing - decreasing)

b 7, 11, 15, 19, 23 (increasing - decreasing)

c 90, 85, 80, 75, 70 (increasing - decreasing)

d 18, 15, 12, 9, 6, 3 (increasing - decreasing)

2

Circle the correct answer for each pattern:

a 5, 10, 15, 20, 25 (addition - subtraction)

b 73, 70, 67, 64, 61 (addition - subtraction)

c 59, 51, 43, 35, 27 (addition - subtraction)

d 15, 25, 35, 45, 55 (addition - subtraction)

3

Match the rule to its pattern:

Pattern

Rule

3, 6, 9, 12, 15, 18

- 5

5, 10, 15, 20, 25

+ 10

10, 20, 30, 40, 50

+ 3

95, 90, 85, 80, 75

+ 4

59, 52, 45, 38, 31

+ 5

26, 30, 34, 38, 42

- 6

46, 40, 34, 28, 22

- 7

78

Math / Chapter (2) - Lesson (76)

4

Use the rule to complete the pattern:

Lesson
(77)

Patterns 4

Outcomes

Students will:

- Participate in Calendar Math activities.
- Identify the rule in a number pattern.
- Create addition and subtraction pattern rules.
- Extend number patterns to five places using a given rule.

Note

In this pattern:

- First, we observe that numbers increased.
- Second, we observe that numbers decreased.

Pattern can have more than one rule.

In the previous pattern:

The first rule is (+ 4). The second rule is (- 2).

1 Complete the pattern as in the Activities

a 30 33 31 34 32

Rule is: $+3, -2$

b 35 30 40

Rule is:

c 44 40 45

Rule is:

d 60 69 63

Rule is:

e 55 50 57

Rule is:

2

Follow the rule and complete:

3 Use the given rule to finish the number pattern:

a) Rule: (+ 5, - 1)

b) Rule: (+ 4, - 3)

25, _____, _____, _____, _____

c) Rule: (+ 2, - 5)

70, _____, _____, _____, _____

d) Rule: (- 3, + 7)

53, _____, _____, _____, _____

e) Rule: (+ 5, - 10)

90, _____, _____, _____, _____

f) Rule: (- 7, + 4)

87, _____, _____, _____, _____

Lesson (78)

Arrays

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Define array.
- Identify arrays and non-arrays.
- Create an array.

⇒ We can arrange things and put them in a pattern called "array" as the following.

⇒ Arrange as the previous example:

Array

An array is a set that shows equal groups in rows and columns with no gaps.

row

column

Non-array

A non-array is a group arranged with a gap. Columns and rows are not perfect.

gap

Circle the pictures that show an array:

Activities

Arrange each group in a suitable array:

Lesson
(79)

Arrays 2

Outcomes

Students will:

- Participate in Calendar Math activities.
- Use repeated addition to find the total number of objects in arrays.
- Write addition equations to express the total number of objects in an array.

Finding the total of things in an array

There are three ways:

1
We count each one. We get 6

2
We find the total in each row, then we use repeated addition.

$$3 + 3 = 6$$

3

We find the total in each column, then we use repeated addition.

$$2 + 2 + 2 = 6$$

Note

Repeated addition means adding a number more than once.

1

Find the total:

Columns:

$$..... + + =$$

Columns:

$$..... + + + =$$

Rows:

$$..... + =$$

2 Count the rows and write the addition equation as the example:

Rows: **2** (**5** + **5** = **10**)

Columns: **5** (**2** + **2** + **2** + **2** + **2** = **10**)

Rows:

Columns:

Rows:

Columns:

Rows:

Columns:

Rows:

Columns:

Lesson (80)

Arrays

3

Outcomes

Students will:

- Participate in Calendar Math activities.
- Write addition equations to express the total number of objects in arrays.
- Design an array using repeated addition.

Rows: 2

Columns: 3

This is a 2 by 3 array

Rows: 3

Columns: 2

This is a 3 by 2 array

Rows:

Columns:

This is a by array

Rows:

Columns:

This is a by array

Activities

1

Complete the array then write its name:

..... by

..... by

..... by

..... by

..... by

..... by

2

Look at the arrays then write the equation:

Rows: 4 , Columns: 3

$$3 + 3 + 3 + 3 = \dots\dots\dots$$

$$4 + 4 + 4 = \dots\dots\dots$$

This is a by array.

Rows: , Columns:

$$\dots\dots + \dots\dots + \dots\dots + \dots\dots = \dots\dots$$

$$\dots\dots + \dots\dots + = \dots\dots$$

This is a by array.

Rows: , Columns:

$$\dots\dots + \dots\dots + \dots\dots + \dots\dots + 4 = \dots\dots$$

$$\dots\dots + \dots\dots + \dots\dots + \dots\dots = \dots\dots$$

This is a by array.

اكتب ذاكرولي في البحث وانضم لجروبات ذاكرولي
مع رياض الأطفال للصف الثالث الاعدادي

3 Colour the rows and columns, then write the array equation:

rows = 2

columns = 3

This is a by array.

rows = 4

columns = 3

This is a by array.

rows = 3

columns = 4

This is a by array.

rows = 2

columns = 1

This is a by array.

Review on Chapter (2)

Choose odd or even:

1 (odd – even)

310 (odd – even)

5 (odd – even)

217 (odd – even)

8 (odd – even)

7 + 5 (odd – even)

49 (odd – even)

6 + 4 (odd – even)

53 (odd – even)

213 + 512 (odd – even)

167 (odd – even)

760 + 532 (odd – even)

164 (odd – even)

111 + 111 (odd – even)

207 (odd – even)

955 (odd – even)

2 Complete:

- 1) The least odd number is
- 2) The greatest odd number formed of one number is
- 3) The greatest even number formed of one number is
- 4) The sum of any two even numbers is an number.

3 Write:

(a) Write 3 even numbers between 20 , 30
Numbers are: , ,

(b) Write 3 odd numbers between 110 , 120
Numbers are: , ,

4

Use these numbers to make a pattern:

- ↳ Lesson (89) Adding with regrouping using abstract models
- ↳ Lesson (90) Math error detectives

Lesson (81)

Estimating quantities

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Apply strategies to estimate quantities.
- Apply strategies to estimate sums and differences.

Estimation is a mental math strategy that we can use to help us find the value that is close enough to the actual value using careful thinking or quick calculations. It is not a random guess.

Note:

When we estimate, we don't expect to come up with an exact answer. We just want to get as close as possible.

Estimate the number of each group (try not to count):

Front – End Estimation

This estimation strategy means we just look at the front of the number, or the highest place value. We do not look at the other places.

EX: Estimate number 43.

Answer: The number 43 has two place, a tens place and a ones place. There is 4 in the Tens place, so we are going to think of 43 as 40

Estimate the following numbers.

$$41 \rightarrow 40$$

$$26 \rightarrow \dots\dots\dots$$

$$73 \rightarrow \dots\dots\dots$$

$$8 \rightarrow \dots\dots\dots$$

$$14 \rightarrow \dots\dots\dots$$

$$89 \rightarrow \dots\dots\dots$$

$$57 \rightarrow \dots\dots\dots$$

$$97 \rightarrow \dots\dots\dots$$

$$15 \rightarrow \dots\dots\dots$$

$$37 \rightarrow \dots\dots\dots$$

Add by estimating the numbers.

Example:

$$53 + 32$$

$$50 + 30 = 80$$

$$170 + 233$$

$$100 + 200 = 300$$

Estimate the sum as the example:

$$\begin{array}{r} 16 \\ + 43 \\ \hline \end{array} \quad \begin{array}{r} 10 \\ + 40 \\ \hline 50 \end{array}$$

$$\begin{array}{r} 34 \\ + 23 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 273 \\ + 123 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 53 \\ + 34 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 264 \\ + 312 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 13 \\ + 27 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 43 \\ + 52 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 32 \\ + 33 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$\begin{array}{r} 172 \\ + 315 \\ \hline \end{array} \quad \begin{array}{r} \\ + \\ \hline \end{array}$$

$$16 + 40 \text{ is about } = 50 \quad 125 + 321 \text{ is about } =$$

$$34 + 23 \text{ is about } = \quad 73 + 21 \text{ is about } =$$

$$53 + 34 \text{ is about } = \quad 423 + 231 \text{ is about } =$$

Estimate the difference

Example:

$$48 - 21$$

$$40 - 20 = 20$$

$$340 - 155$$

$$300 - 100 = 200$$

1 Complete:

$$53 - 42$$

$$50 - 40 = 10$$

$$63 - 42$$

$$\dots - \dots = \dots$$

$$62 - 42$$

$$\dots - \dots = \dots$$

$$64 - 16$$

$$\dots - \dots = \dots$$

$$43 - 22$$

$$\dots - \dots = \dots$$

$$82 - 53$$

$$\dots - \dots = \dots$$

$$695 - 462$$

$$\dots - \dots = \dots$$

$$32 - 11$$

$$\dots - \dots = \dots$$

$$774 - 235$$

$$\dots - \dots = \dots$$

$$17 - 13$$

$$\dots - \dots = \dots$$

$$345 - 126$$

$$\dots - \dots = \dots$$

$$53 - 41$$

$$\dots - \dots = \dots$$

2 Estimate using front-end estimation strategy:

a) $32 + 54$ + =

b) $93 - 41$ - =

c) $153 + 215$ + =

d) $86 - 25$ - =

e) $57 + 22$ + =

f) $463 - 332$ - =

g) $275 + 536$ + =

2 Estimate then match:

$13 + 38$

+

$98 - 36$

-

$68 + 16$

+

Lesson
(82)

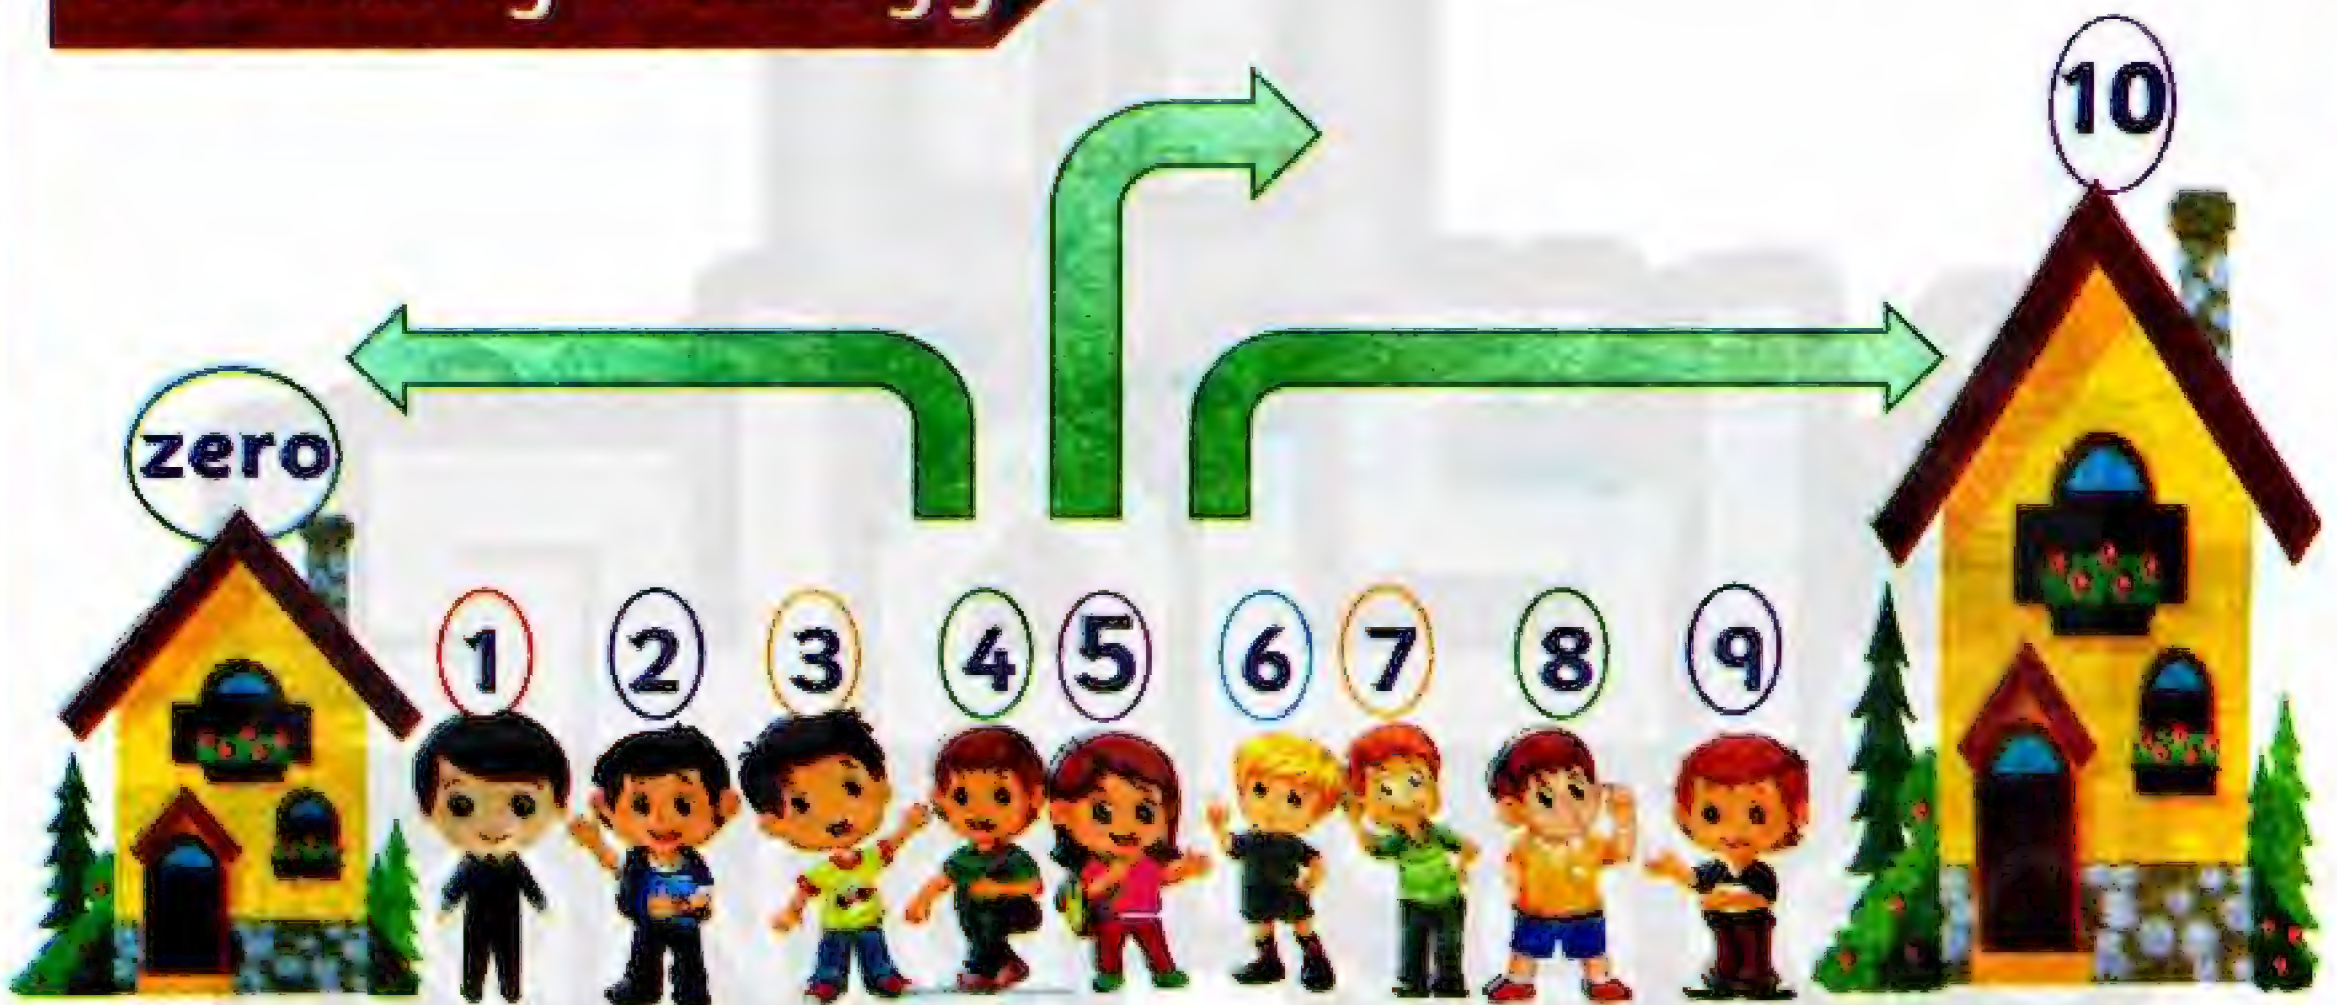

Estimating quantities 2

Outcomes

Students will:

- Participate In Calendar Math Activities
- Round **2-digit** numbers to the nearest **Ten**.
- Round **two 2-digit** numbers to estimate their sum.

Rounding strategy

Note

The first **four** boys are closer to the small house but the last **four** boys are closer to the big house.

The **fifth** girl is in the middle, but if you ask her which house you want to live in, she will say the big house. So, the girl in the middle is close to the big house, too.

Numbers **31**, **32**, **33** and **34** are closer to the smaller ten (**30**), but numbers **35**, **36**, **37**, **38** and **39** are closer to the greater ten (**40**).

Learn:

If we use the front-end estimation strategy, we just look at the **Tens** place and think of **36** as **30** but to round 2-digit numbers, we also look at the **Ones** place and think about which **Tens** number we are closer to.

Activities

1

Round the following numbers to the nearest ten:

Number	Nearest 10	Number	Nearest 10
43	40	16	
52		76	
67		25	
83		42	
91		15	
24		55	
26		9	
13		2	

2

Round each number to the nearest ten then follow the color code:

20

40

50

60

Estimate the result using rounding strategy:

$$\begin{array}{r} 64 + 25 \\ \downarrow \quad \downarrow \\ 60 + 30 = 90 \end{array}$$

64 is closer to 60
and 25 is closer to 30

$$49 - 34$$

$$\downarrow \quad \downarrow$$

$$50 - 30 = 20$$

49 is closer to 50

and 34 is closer to 30

3

Estimate the results:

$$34 + 45$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$52 + 14$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$43 + 22$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$67 - 43$$

$$\downarrow \quad \downarrow$$

$$\text{.....} - \text{.....} = \text{.....}$$

$$55 + 21$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$45 + 15$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$57 + 25$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$93 - 27$$

$$\downarrow \quad \downarrow$$

$$\text{.....} - \text{.....} = \text{.....}$$

$$13 + 26$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$56 - 9$$

$$\downarrow \quad \downarrow$$

$$\text{.....} - \text{.....} = \text{.....}$$

$$76 + 23$$

$$\downarrow \quad \downarrow$$

$$\text{.....} + \text{.....} = \text{.....}$$

$$54 - 32$$

$$\downarrow \quad \downarrow$$

$$\text{.....} - \text{.....} = \text{.....}$$

www.facebook.com/ZakroolySite

Lesson (83)

Round 3-digit numbers to the nearest Hundred

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Apply estimation strategies in problem-solving situations.
- Estimate sums and differences.
- Round 3-digit numbers to the nearest hundred.

Example: Get the result using front-end estimation and rounding together:

$$43 + 39$$

Front-end strategy $\longrightarrow 40 + 30 = 70$

Rounding strategy $\longrightarrow 40 + 40 = 80$

★ Do as the example:

Front-end strategy	Problem	Rounding strategy
$30 + 20 = 50$	$36 + 23$	$40 + 20 = 60$
..... + =	$44 + 23$ + =
..... + =	$43 + 26$ + =
..... - =	$93 - 78$ - =
..... - =	$67 - 23$ - =
..... + =	$81 + 12$ + =

Rounding to the nearest Hundred

Numbers 110, 120, 130 and 140 are closer to 100

Numbers 150, 160, 170, 180 and 190 are closer to 200

★ Round the following numbers to the nearest 100:

140 → 100

270 → 300

330 →

490 →

720 →

680 →

530 →

120 →

★ Complete the table as the example:

Front-end	Number	Rounding
200	230	200
.....	470
.....	360
.....	790
.....	560
.....	840

Example: Estimate the sum using the front-end estimation and rounding together:

$$130 + 480$$

$$130 + 480$$

$$100 + 500 = 600$$

Rounding

$$130 + 480$$

$$100 + 400 = 500$$

Front-end estimation

In **front-end estimation** we just look at the numbers in the place with the greatest value

Estimate the sum:

Front-end	Problem	Rounding
$100 + 100 = 200$	$140 + 160$	$100 + 200 = 300$
.....	$560 + 320$
.....	$230 + 360$
.....	$480 + 420$
.....	$160 + 380$
.....	$670 + 220$

★ Estimate using the two strategies as the example:

$$160 + 420$$

Front-end estimation

$$100 + 400 = 500$$

Rounding

$$200 + 400 = 600$$

$$530 + 270$$

Front-end estimation

$$\dots + \dots = \dots$$

Rounding

$$\dots + \dots = \dots$$

$$360 + 310$$

Front-end estimation

$$\dots + \dots = \dots$$

Rounding

$$\dots + \dots = \dots$$

$$430 - 130$$

Front-end estimation

$$\dots - \dots = \dots$$

Rounding

$$\dots - \dots = \dots$$

$$920 - 370$$

Front-end estimation

$$\dots - \dots = \dots$$

Rounding

$$\dots - \dots = \dots$$

$$751 + 140$$

Front-end estimation

$$\dots + \dots = \dots$$

Rounding

$$\dots + \dots = \dots$$

Lesson (84)

Adding 2-digit numbers with regrouping

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Add **2-digit** numbers with regrouping.
- Explain why it is sometimes necessary to regroup to solve problems.

$$25 + 37 = 62$$

The total ones is more than 9, so we need to regroup **12** to **1** tens and **2** ones.

Activities

1 Draw for a ten for a one, then regroup to find the sum:

$$47 + 32 = \boxed{\dots\dots\dots}$$

Tens	Ones

Tens	Ones

Tens	Ones

$$25 + 45 = \boxed{\dots\dots\dots}$$

Tens	Ones

Tens	Ones

Tens	Ones

2 Find the sum with regrouping as the example:

$$53 + 39 = 92$$

Tens	Ones
5	3

Tens	Ones
3	9

Tens	Ones
9	2

تابع جديد ذاكرولي على

$$55 + 37 = \boxed{\dots\dots\dots}$$

Tens	Ones
.....

Tens	Ones
.....

Tens	Ones
.....

$$48 + 39 = \boxed{\dots\dots\dots}$$

Tens	Ones
.....

Tens	Ones
.....

Tens	Ones
.....

Find the sum with regrouping as the example:

$$33 + 58 = 80 + 11 = 90 + 1 = 91$$

$$24 + 37 = \dots\dots\dots = \dots\dots\dots = \dots\dots\dots$$

$$63 + 29 = \dots\dots\dots = \dots\dots\dots = \dots\dots\dots$$

$$57 + 25 = \dots\dots\dots = \dots\dots\dots = \dots\dots\dots$$

$$39 + 46 = \dots\dots\dots = \dots\dots\dots = \dots\dots\dots$$

الصف الثاني الابتدائي

Lesson (85)

Adding 2-digit numbers with regrouping

2

Outcomes

Students will:

- Participate in Calendar Math activities.
- Use place value models to regroup and add.
- Add two 2-digit numbers with regrouping.

Activities

1

Get the sum using drawings to help you regroup:

$$26 + 35 =$$

61

$$32 + 18 =$$

.....

$$47 + 37 =$$

.....

$$53 + 26 =$$

.....

$$75 + 19 =$$

.....

2 Solve the addition problems with regrouping:

$$\begin{array}{r} \textcircled{1} \\ 53 \\ + 28 \\ \hline \end{array}$$

81

$$\begin{array}{r} \textcircled{1} \\ 54 \\ + 37 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \textcircled{1} \\ 43 \\ + 29 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \textcircled{1} \\ 66 \\ + 27 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \textcircled{1} \\ 57 \\ + 25 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \textcircled{1} \\ 54 \\ + 26 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \textcircled{1} \\ 48 \\ + 25 \\ \hline \end{array}$$

.....

$$\begin{array}{r} \textcircled{1} \\ 77 \\ + 15 \\ \hline \end{array}$$

.....

3 Get the sum using regrouping:

$$29 + 34 = 63$$

$$35 + 46 = \dots\dots\dots$$

$$25 + 36 = \dots\dots\dots$$

$$57 + 29 = \dots\dots\dots$$

$$24 + 68 = \dots\dots\dots$$

$$57 + 24 = \dots\dots\dots$$

$$39 + 22 = \dots\dots\dots$$

$$36 + 56 = \dots\dots\dots$$

$$19 + 24 = \dots\dots\dots$$

$$45 + 35 = \dots\dots\dots$$

Lesson (86)

Adding 3-digit numbers with regrouping

3

Outcomes

Students will:

- Participate in Calendar Math activities.
- Use place value models to regroup and add.
- Add **two 3-digit** numbers with regrouping.

Remember

=

10 tens

one hundred

=

11 tens

one hundred one tens

★ Add with regrouping as the example:

$$63 + 52 = 115$$

First we add the ones ($3 + 2 = 5$), next we add the tens ($6 + 5 = 11$), 11 is more than 9, so we regroup 11 (1 Tens and 1 Hundred)

$$33 + 74 = \dots\dots\dots$$

$$45 + 84 = \dots\dots\dots$$

Find the sum as the example:

$$\begin{array}{r} 472 \\ + 156 \\ \hline \end{array}$$

Hundreds	Tens	Ones
4	7	2
1	5	6
5	12	8

=

Hundreds	Tens	Ones
6	2	8

Hundreds	Tens	Ones
		

=

Hundreds	Tens	Ones
		

$$\begin{array}{r} 393 \\ + 521 \\ \hline \end{array}$$

.....

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

$$\begin{array}{r} 296 \\ + 551 \\ \hline \end{array}$$

.....

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

$$\begin{array}{r} 486 \\ + 263 \\ \hline \end{array}$$

.....

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

$$\begin{array}{r} 352 \\ + 155 \\ \hline \end{array}$$

.....

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

$$\begin{array}{r} 271 \\ + 468 \\ \hline \end{array}$$

.....

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

$$\begin{array}{r} 253 \\ + 425 \\ \hline \end{array}$$

.....

Hundreds	Tens	Ones

=

Hundreds	Tens	Ones

Lesson (87)

Adding 3-digit numbers with regrouping

4

Outcomes

Students will:

- Participate In Calendar Math Activities.
- Add two **2-digit** in numbers with regrouping.
- Apply mental math strategies to solve an addition problem involving regrouping.

$$156 + 265 = 421$$

First, we add the ones ($5 + 6 = 11$).

We regroup **11** to **1** ones and **1** tens.

Then, we add tens ($1 + 5 + 6 = 12$).

We regroup **12** to **2** tens and **1** hundreds.

At the end we regroup hundreds ($1 + 1 + 2 = 4$).

Lesson (90)

Math error identifying

Outcomes

Students will:

- Participate in Calendar Math activities.
- Identify and correct errors in estimation and regrouping problems.
- Add 1-, 2-, and 3-digit numbers with and without regrouping.

1

Put (✓) or (×):

1) $64 + 6 = 60$

2) Estimating $37 + 54$ by front-end strategy is $40 + 50$

3) 85 to the nearest ten is 80.

4) The estimated difference rounding of $174 - 72$ is $170 - 70 = 100$

5) $264 + 18 = 272$

6) The estimated sum of $89 - 64 = 30$

7) 59 is closer to 50 (to the nearest 10).

8) When we round 45 to the nearest ten, the answer is 40.

9) $240 + 72 = 212$

10) When we round to estimate the sum of $37 + 27$, the problem will be as $40 + 30 = 80$

11) Hanan has 46 pounds and her sister Mona has 44 pounds. How many pounds do they have all together?
They have

.....

.....

3

Check each problem. If the answer is incorrect, mark it with ✖, if the answer is correct mark it with ★, correct one of them:

$$123 + 59 = 172$$

(.....)

$$99 + 8 = 107$$

(.....)

$$150 + 67 = 217$$

(.....)

35 to the nearest ten is 30

(.....)

78 - 21 round to the nearest 10

$$80 - 20 = 70$$

(.....)

Estimate the difference: $150 - 82 \rightarrow 100 - 80 = 20$

(.....)

Estimate the sum:

$$48 + 38 \rightarrow 50 + 40 = 90$$

(.....)

Laila baked 56 cookies. Amer baked 25 cookies.
How many cookies did they bake all together?

They baked 81 cookies.

(.....)

1

Choose the correct answer:

- 1) 64 to the nearest ten is (50 – 60 – 70)
- 2) 275 to the nearest ten is (80 – 270 – 280)
- 3) 399 to the nearest ten is (100 – 390 – 400)
- 4) 4 is closer to (0 – 1 – 5)
- 5) If we deal with the sum of $25 + 76$ using front-end strategy, the estimated sum will be (90 – 100 – 80)
- 6) The estimated sum of 36 and 54 is (80 – 90 – 100)
- 7) If the estimated sum of $67 + 27 = 80$, so the used strategy is (rounding to the nearest ten – front-end)
- 8) 180 to the nearest hundred is (80 – 200 – 280)
- 9) The estimated difference by using front-end strategy through the highest place value between the numbers 490 , 210 is (200 – 250 – 300)
- 10) 250 to the nearest hundred is (200 – 300 – 400)

2

Estimate the result using front-end strategy:

$$74 + 35 = \dots\dots\dots$$

$$26 + 37 = \dots\dots\dots$$

$$92 + 44 = \dots\dots\dots$$

$$64 + 85 = \dots\dots\dots$$

$$260 + 370 = \dots\dots\dots$$

$$480 + 75 = \dots\dots\dots$$

$$370 + 48 = \dots\dots\dots$$

$$610 + 270 = \dots\dots\dots$$

$$320 + 330 = \dots\dots\dots$$

$$450 + 350 = \dots\dots\dots$$

$$690 + 290 = \dots\dots\dots$$

$$480 + 310 = \dots\dots\dots$$

3

Find the result:

$$\begin{array}{r} 64 \\ + \\ 25 \\ \hline \end{array}$$

$$\begin{array}{r} 63 \\ + \\ 27 \\ \hline \end{array}$$

$$\begin{array}{r} 27 \\ + \\ 23 \\ \hline \end{array}$$

$$\begin{array}{r} 47 \\ + \\ 32 \\ \hline \end{array}$$

$$\begin{array}{r} 63 \\ + \\ 72 \\ \hline \end{array}$$

$$\begin{array}{r} 43 \\ + \\ 29 \\ \hline \end{array}$$

$$\begin{array}{r} 163 \\ + \\ 155 \\ \hline \end{array}$$

$$\begin{array}{r} 271 \\ + \\ 214 \\ \hline \end{array}$$

$$\begin{array}{r} 639 \\ + \\ 226 \\ \hline \end{array}$$

$$\begin{array}{r} 146 \\ + \\ 272 \\ \hline \end{array}$$

$$\begin{array}{r} 253 \\ + \\ 129 \\ \hline \end{array}$$

$$\begin{array}{r} 472 \\ + \\ 291 \\ \hline \end{array}$$

4

Find the result:

$36 + 25 = \dots\dots\dots$

$409 + 319 = \dots\dots\dots$

$64 + 27 = \dots\dots\dots$

$621 + 229 = \dots\dots\dots$

$76 + 19 = \dots\dots\dots$

$456 + 329 = \dots\dots\dots$

$83 + 28 = \dots\dots\dots$

$374 + 127 = \dots\dots\dots$

$276 + 173 = \dots\dots\dots$

$316 + 276 = \dots\dots\dots$

$391 + 492 = \dots\dots\dots$

$541 + 292 = \dots\dots\dots$

5

Estimate the difference to the nearest 10 then match:

$81 - 62 = \dots\dots\dots$

40

$56 - 29 = \dots\dots\dots$

20

$91 - 47 = \dots\dots\dots$

10

$86 - 78 = \dots\dots\dots$

Lesson (91)

Fact family(ies) / The relationship between addition and subtraction

Outcomes

Students will:

- Participate in Calendar Math activities.
- Create addition and subtraction sentences using fact families.
- Explain the relationship between addition and subtraction.

Notice

★ The **addition** and **subtraction** are **inverse** or **opposite** of each other.

★ We can use **one** to help us with the other.

★ These three **numbers** are part of a family.

★ Mathematicians call them **fact families**.

Fact family

★ There is a relationship between these three numbers **6**, **4** and **10**.

★ If we have **10** and take away or subtract **4**, we have a difference of **6**.

We conclude

$$6 + 4 = 10, 10 - 6 = 4, 10 - 4 = 6$$

2

Complete as the example using fact families:

$$4 + 5 = \dots\dots\dots$$

4

$$\dots\dots\dots - 4 = 5$$

5

$$\dots\dots\dots - 5 = 4$$

.....

$$5 + \dots\dots\dots = 9$$

$$\dots\dots\dots + 2 = 7$$

.....

$$7 - \dots\dots\dots = 2$$

2

$$7 - 2 = \dots\dots\dots$$

7

$$2 + \dots\dots\dots = 7$$

$$6 + \dots\dots\dots = 11$$

6

$$11 - \dots\dots\dots = 5$$

.....

$$11 - \dots\dots\dots = 6$$

11

$$5 + \dots\dots\dots = 11$$

$$\dots\dots\dots + 10 = 15$$

5

$$5 + \dots\dots\dots = 15$$

10

$$15 - \dots\dots\dots = 5$$

15

$$\dots\dots\dots - 5 = 10$$

$$\dots\dots\dots + 3 = 10$$

.....

$$10 - 7 = \dots\dots\dots$$

3

$$3 + \dots\dots\dots = 10$$

10

$$10 - \dots\dots\dots = 7$$

Lesson (92)

Adding and subtracting using the number line

Outcomes

Students will:

- Participate in Calendar Math activities.
- Use a number line to subtract.
- Investigate the relationship between addition and subtraction using a number line.

Remember

The number line is:

- ★ A great tool to help us see the distance between numbers.
- ★ When we start at (1) and land at (9), we make 8 hops.
- ★ Number line can help us in addition and subtraction problems.

Example

1

Add $12 + 7$ using the number line:

We started at 12 and made 7 hops, we landed at (19).

$$12 + 7 = 19$$

Notice

This strategy is called **counting on**.

1

Try yourself

Add $7 + 12$ using the number line:

$$7 + 12 = \dots\dots\dots$$

2

Subtract $19 - 7$ using the number line:

We started at **19** and hopped back **7** hops, we landed at (**12**).

$$19 - 7 = 12$$

This strategy is called
counting back.

تابعنا على صفحتنا على الفيسبوك
www.facebook.com/ZakroolySite

2

Try yourself

Subtract 19 - 12 using the number line:

$$19 - 12 = \dots\dots\dots$$

Complete this fact family:

$12 + 7 = \dots\dots\dots$	$7 + 12 = \dots\dots\dots$
$19 - 7 = \dots\dots\dots$	$19 - 12 = \dots\dots\dots$

Activities

1

Complete using the number line:

$$16 + 5 = \dots\dots\dots$$

$$23 - 6 = \dots\dots\dots$$

2

Complete using the number line:

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20

a) $17 - 5 =$

b) $15 - 9 =$

c) $18 - 12 =$

d) $17 - 8 =$

e) $16 - 9 =$

Math / Chapter (4) - Lesson (92)

Lesson (93)

Story problems involving subtraction

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Solve story problems involving subtraction.
- Identify words that signal them to subtract to solve a problem.

Solve story problems with different ways:

Adel had 65 pounds. He gave his sister 14 pounds.
How many pounds does Adel have now?

The first way by using

The result = $65 - 14 = 51$

The second way by using number chart:

61	62	63	64	65	66	67	68	69	70
51	52	53	54	55	56	57	58	59	60

The result = $65 - 14 = 51$

The third way by using number line:

The result = $65 - 14 = 51$

Subtraction words: difference - less than - more than -
How much / many more - How much
/ many less - left over - spent - gave -
taken

The order in addition problem does not matter ($3 + 4$) and ($4 + 3$) are the same, but the order in subtraction matters, ($10 - 7$) and ($7 - 10$) are not the same. We should start with the greater number in subtraction problems.

Activities

1

Do these problems:

1) Hala counts 335 sunflower seeds. She places 98 of the seeds in bowl. How many seeds left?

Answer:

.....

.....

2) There were 75 an ant in ant hill, 13 ants left. How many ants are there now?

Answer:

.....

.....

3) There were **35** monkeys in the yard of the zoo,
7 monkeys ran into the monkey house.
How many monkeys left in the yard?

Answer:

4) **228** students like red, **29** students like blue.
How many more students like blue than red?

Answer:

5) There are **25** chairs in one classroom and there
are **28** chairs in another classroom.
How many chairs are there in all?

Answer:

6) The pet store has **84** small lizards; there are also
35 large lizards. How many lizards are there at
the pet store in all?

Answer:

7) Rana jumped **382** times with a rope, Ola jumped **231** with a rope.
How many more jumps did Rana do than Ola?

Answer:

8) A store had **472** bouncy balls, they sold **155**.
How many bouncy balls left?

Answer:

9) Zeinab hit **294** golf balls in a day; she hit **14** out of them in the morning. How many golf balls did she hit during the rest of that day?

Answer:

10) Ahmed saved **LE 25** in December, **LE 16** in January and **LE 9** in February. How much money did Ahmed save in the three months?

Answer:

Lesson (94)

Decomposing 2-digit Numbers into Combinations of Tens and Ones

Outcomes

Students will:

- Participate in Calendar Math activities.
- Decompose 2-digit numbers into combinations of Tens and Ones.
- Explain how decomposing numbers can be helpful.

Remember

Decomposing a Number means to break it into smaller parts.

Example

34 can be decomposed into

$30 + 4$ or $20 + 14$ and so on

Decomposing Numbers makes them easier to work with.

Activities

1 Decompose into Tens and Ones in different ways:

$$29 = 10 + 10 + 9$$

$$29 = \dots + 9$$

$$29 = 20 + 5 + \dots$$

$$37 = 10 + 10 + 10 + 7$$

$$37 = 20 + \dots$$

$$37 = 10 + \dots$$

$$35 = 10 + 10 + 10 + \dots$$

$$35 = 30 + 3 + \dots$$

$$\dots$$

$$35 = 10 + 10 + 3$$

$$23 = \dots + 3$$

$$23 = 20 + 2 + \dots$$

We can write $20 + 5 = 25$ (as an example)
 $25 = 20 + 5$. A number sentence can have the whole (sum) written first or last, it does not matter. $40 + 5 = 45$ the same $45 = 40 + 5$

2 Write the missing numbers:

$$40 + 5 = \dots$$

$$30 + 7 = \dots$$

$$20 + 17 = \dots$$

$$93 = 90 + \dots$$

$$66 = 60 + \dots$$

$$78 = \dots + 70$$

$$30 + 15 = \dots\dots\dots$$

$$\dots\dots\dots = 30 + 16$$

$$49 = \dots\dots\dots + 9$$

$$\dots\dots\dots = 20 + 27$$

$$58 = 8 + \dots\dots\dots$$

$$36 = \dots\dots\dots + 6$$

$$40 = \dots\dots\dots + 10$$

$$\dots\dots\dots = 12 + 36$$

3 Record three different ways to decompose each number into smaller addends on the lines provided:

54

$$= 20 + 20 + 10 + 4$$

$$= 30 + 10 + 10 + 4$$

$$= 40 + 10 + 4$$

.....

47

Lesson (95)

Cluster problems

Outcomes

Students will:

- Participate in Calendar math activities.
- Apply mental math strategies to subtract by Tens or Hundreds.
- Use known subtraction answers to solve new Problems.

Cluster problems are sets of **three** or more problems that use known facts from the first problem to answer a more difficult problem.

Example:

$$\begin{aligned} 94 - 10 &= \dots\dots\dots \\ 94 - 20 &= \dots\dots\dots \\ 94 - 40 &= \dots\dots\dots \\ 94 - 44 &= \dots\dots\dots \end{aligned}$$

Each problem is kind of like a key that unlocks the solutions to the others

$$\begin{aligned} 94 - 10 &= 84 \quad (\text{We only subtracted one ten}) \\ 94 - 20 &= 74 \quad (\text{We only subtracted one more ten}) \\ 94 - 40 &= 54 \quad (\text{We subtracted two more tens}) \\ 94 - 44 &= 50 \quad (\text{We subtracted more 4 ones}) \end{aligned}$$

Notice:

We can use $94 - 44 = 50$ as a key to the problem $94 - 45$, we need only to subtract only one more. The result will be 49.

Activities

1

Complete:

$$86 - 10 = \dots\dots\dots$$

$$86 - 20 = \dots\dots\dots$$

$$86 - 40 = \dots\dots\dots$$

$$86 - 46 = \dots\dots\dots$$

$$86 - 47 = \dots\dots\dots$$

$$67 - 10 = \dots\dots\dots$$

$$67 - 20 = \dots\dots\dots$$

$$67 - 40 = \dots\dots\dots$$

$$67 - 47 = \dots\dots\dots$$

$$67 - 48 = \dots\dots\dots$$

$$150 - 10 = \dots\dots\dots$$

$$150 - 50 = \dots\dots\dots$$

$$150 - 100 = \dots\dots\dots$$

$$150 - 99 = \dots\dots\dots$$

$$230 - 10 = \dots\dots\dots$$

$$230 - 200 = \dots\dots\dots$$

$$230 - 30 = \dots\dots\dots$$

$$230 - 100 = \dots\dots\dots$$

$$292 - 10 = \dots\dots\dots$$

$$292 - 20 = \dots\dots\dots$$

$$292 - 40 = \dots\dots\dots$$

$$292 - 42 = \dots\dots\dots$$

$$650 - 50 = \dots\dots\dots$$

$$650 - 200 = \dots\dots\dots$$

$$650 - 51 = \dots\dots\dots$$

$$650 - 202 = \dots\dots\dots$$

Mental math subtracting

Example

1

Subtract: $50 - 9$

To find the difference easily, consider the problem is $50 - 10 = 40$ then add 1.

The result is **41**

Example

2

Subtract: $130 - 11$

Consider the problem is $130 - 10 = 120$ then subtract another 1.

The result is **119**

Example

3

Subtract: $340 - 99$

Consider the problem is $340 - 100 = 240$ then add 1.

The result is **241**

Example

4

Subtract: $670 - 201$

Consider the problem is $670 - 200 = 470$ then subtract another one.

The result is **469**

2 Complete using mental math strategy:

$$94 - 44 = 50$$

$$94 - 45 = 49$$

$$76 - 30 = 46$$

$$76 - 29 = 47$$

$$460 - 60 = \dots\dots\dots$$

$$460 - 61 = \dots\dots\dots$$

$$650 - 50 = \dots\dots\dots$$

$$650 - 48 = \dots\dots\dots$$

$$86 - 20 = \dots\dots\dots$$

$$86 - 21 = \dots\dots\dots$$

$$230 - 100 = \dots\dots\dots$$

$$230 - 99 = \dots\dots\dots$$

$$970 - 30 = \dots\dots\dots$$

$$970 - 32 = \dots\dots\dots$$

$$340 - 100 = \dots\dots\dots$$

$$340 - 102 = \dots\dots\dots$$

3 Find the difference using mental math strategy:

$$74 - 9 = \dots\dots\dots$$

$$74 - 11 = \dots\dots\dots$$

$$140 - 41 = \dots\dots\dots$$

$$140 - 39 = \dots\dots\dots$$

$$980 - 199 = \dots\dots\dots$$

$$980 - 201 = \dots\dots\dots$$

$$740 - 99 = \dots\dots\dots$$

$$89 - 19 = \dots\dots\dots$$

$$89 - 21 = \dots\dots\dots$$

$$560 - 99 = \dots\dots\dots$$

$$560 - 101 = \dots\dots\dots$$

$$750 - 51 = \dots\dots\dots$$

$$750 - 49 = \dots\dots\dots$$

$$860 - 201 = \dots\dots\dots$$

Lesson (96)

Subtracting 2-Digit Numbers with Regrouping

1

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Use place value models to regroup and subtract.
- Subtract 2-digit numbers with regrouping.
- Define regrouping.

Regrouping means changing the way you group your Tens and Ones.

Example: Add $28 + 16$

تابعنا على صفحتنا على الفيسبوك
www.facebook.com/ZakroolySite

Try yourself

Add $34 + 8$

Tens	Ones

.....

+

Tens	Ones

.....

=

Tens	Ones

.....

Add $46 + 15$

Tens	Ones

.....

+

Tens	Ones

.....

=

Tens	Ones

.....

Complete with regrouping as the example:

How to subtract with regrouping?

When we regroup with addition, we take **10 ones** and make a new **ten**, but when we regroup with subtraction, we take one of our ten bundles and break it apart into **10 ones**.

Example:

Subtract $62 - 47$

First we started with the **ones**, we cannot take **7** from **2**, so we need to do regrouping.

Try yourself

Subtract $53 - 25$

Subtract $56 - 19$

56

19

.....

Tens	Ones

Tens	Ones

Subtract $65 - 27$

65

27

.....

Tens	Ones

Tens	Ones

Subtract $72 - 26$

72

26

.....

Tens	Ones

Tens	Ones

Subtract $87 - 39$

	Tens	Ones	=	Tens	Ones
87					
- 39					
.....					

Subtract $43 - 26$

	Tens	Ones	=	Tens	Ones
43					
- 26					
.....					

Subtract $44 - 12$

	Tens	Ones	=	Tens	Ones
44					
- 12					
.....					

Lesson (97)

Subtracting 2-Digit Numbers with Regrouping

2

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Use place value models to regroup and subtract.
- Subtract 2-digit numbers with regrouping.
- Apply strategies to estimate differences.

If we subtract (3) from (9) (as an example), we call (9) is the minuend, (3) is the subtrahend and the result of subtraction operation is the difference.

$$9 - 3 = 6$$

minuend

subtrahend

difference

Try yourself

Problem	Minuend	Subtrahend	Difference
$12 - 5 = \dots\dots\dots$			
$39 - 12 = \dots\dots\dots$			
$147 - 47 = \dots\dots\dots$			
$629 - 199 = \dots\dots\dots$			

Example:

Estimate the difference, then model using the place value mat. Record the difference, then compare the difference to your estimate.

$$264 - 47 = 210$$

$$260 - 50 = \text{estimate}$$

$$\begin{array}{r} 264 \\ - 47 \\ \hline 217 \end{array}$$

Hundreds	Tens	Ones

$$173 - 48 = \dots\dots\dots$$

.....

$$\begin{array}{r} 173 \\ - 48 \\ \hline \dots\dots\dots \end{array}$$

Hundreds	Tens	Ones

Activities

★ Subtract:

$$176 - 59 = \dots\dots\dots$$

.....

176

59

Hundreds

Tens

Ones

.....

$$148 - 29 = \dots\dots\dots$$

.....

148

29

Hundreds

Tens

Ones

.....

$$253 - 46 = \dots\dots\dots$$

.....

253

46

Hundreds

Tens

Ones

.....

Lesson (98)

Subtracting 2- and 3-digit numbers with regrouping

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Use place value models to regroup and subtract.
- Subtract **2-digit** and **3-digit** numbers with regrouping.
- Apply strategies to estimate differences.

1 hundred = 10 tens

100

Example: Subtract $329 - 179$

We can't take **7 Tens** from **2 Tens**, so we need to regroup; we break one hundred apart into **10 Tens**.

Hundreds	Tens	Ones

What did we do?

$$329 - 179 = 150$$

First: We broke one hundred apart into 10 Tens.

Second: We canceled 9 ones: $9 - 9 = 0$.

Third: We canceled 7 Tens $12 - 7 = 5$.

Fourth: We canceled 1 Tens hundreds $2 - 1 = 1$.

Activities

1 Estimate the difference, then draw the problem. Subtract, write the difference, and then compare the difference to your estimation:

$$329 - 189 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

$$245 - 63 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

$$719 - 257 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

$$425 - 273 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

$$337 - 192 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

$$536 - 243 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

$$682 - 491 = \dots\dots\dots$$

Estimation:

Hundreds	Tens	Ones

Lesson (99)

Subtracting 2-and 3 digit numbers with regrouping

2

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Subtract 2 - and 3 - digit numbers with regrouping.
- Make connections between concrete and abstract Models of regrouping.
- Apply strategies to estimate differences.

Example:

Subtract $365 - 49$ (Using Hundreds Tens - Ones chart)

Hundreds	Tens	Ones
3	6	5
-	4	9

1) We can't take 9 from 5, so we are going to take 1 of the tens.

Hundreds	Tens	Ones
3	5	15
-	4	9

2) We need to put that ten over to the ones place.

Hundreds	Tens	Ones
3	5	15
-	4	9
		6

Hundreds	Tens	Ones
3	5	15
-	4	9
	1	6

3) Subtract $15 - 9 = 6$
(Ones from one)

4) Subtract $5 - 4 = 1$
(Tens from tens)

Hundreds	Tens	Ones
3	5	15
-	4	9
3	1	6

Hundreds	Tens	Ones
3	5	15
-	4	9
3	1	6

5) We subtracted is $3 - 0 = 3$

(Hundreds from hundreds)

Activities

1 Subtract as the example:

Example: $472 - 356 = 116$

Hundreds	Tens	Ones
4	6 7	¹ 2
3	5	6
1	1	6

$423 - 217 =$

Hundreds	Tens	Ones

$527 - 359 =$

Hundreds	Tens	Ones

$623 - 343 =$

Hundreds	Tens	Ones

$462 - 146 =$

Hundreds	Tens	Ones

$327 - 118 =$

Hundreds	Tens	Ones

$$836 - 518 =$$

Hundreds	Tens	Ones

$$236 - 59 =$$

Hundreds	Tens	Ones

2

Subtract:

$$632 - 261 =$$

Hundreds	Tens	Ones
5 6	1 3	2
2	6	1
5	7	1

$$426 - 274 =$$

Hundreds	Tens	Ones

$$327 - 165 =$$

Hundreds	Tens	Ones

$$543 - 262 =$$

Hundreds	Tens	Ones

$$637 - 97 =$$

Hundreds	Tens	Ones

$$367 - 159 =$$

Hundreds	Tens	Ones

Lesson (100)

Practice on addition and subtraction

Outcomes

Students will:

- Participate in Calendar Math activities.
- Share 100th day collections.
- Analyze their math learning over the last 100 days.

Subtract as the example:

$$\begin{array}{r} \overset{3}{\cancel{4}} \overset{16}{\cancel{6}} \\ - 27 \\ \hline \end{array}$$

$$\boxed{19}$$

$$\begin{array}{r} \overset{1}{\cancel{4}} \overset{13}{\cancel{23}} \\ - 117 \\ \hline \end{array}$$

$$\boxed{306}$$

$$\begin{array}{r} \overset{4}{\cancel{5}} \overset{13}{\cancel{37}} \\ - 395 \\ \hline \end{array}$$

$$\boxed{142}$$

$$\begin{array}{r} 67 \\ - 29 \\ \hline \end{array}$$

$$\boxed{\dots\dots\dots}$$

$$\begin{array}{r} 48 \\ - 29 \\ \hline \end{array}$$

$$\boxed{\dots\dots\dots}$$

$$\begin{array}{r} 42 \\ - 16 \\ \hline \end{array}$$

$$\boxed{\dots\dots\dots}$$

$$\begin{array}{r} 172 \\ - 37 \\ \hline \end{array}$$

$$\boxed{\dots\dots\dots}$$

$$\begin{array}{r} 563 \\ - 47 \\ \hline \end{array}$$

$$\boxed{\dots\dots\dots}$$

$$\begin{array}{r} 432 \\ - 16 \\ \hline \end{array}$$

$$\boxed{\dots\dots\dots}$$

$$\begin{array}{r} \textcircled{4} \textcircled{3} 7 \\ - 219 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{4} \textcircled{6} 2 \\ - 171 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{7} \textcircled{3} 4 \\ - 242 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{5} \textcircled{3} 6 \\ - 160 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{5} \textcircled{6} \\ - 47 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{8} \textcircled{0} \\ - 36 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{7} \textcircled{1} \\ - 24 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{9} \textcircled{0} \\ - 63 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{5} \textcircled{3} 7 \\ - 277 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{4} \textcircled{3} 7 \\ - 128 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{3} \textcircled{6} 7 \\ - 295 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{1} \textcircled{0} 6 \\ - 93 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{5} \textcircled{2} \\ - 26 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{7} \textcircled{0} \\ - 63 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{5} \textcircled{0} \\ - 24 \\ \hline \end{array}$$

$$\begin{array}{r} \textcircled{7} \textcircled{0} \\ - 53 \\ \hline \end{array}$$

نقوم في أي عمل عليه العلامة دي

Activities

1

Color the problem with the same color of the result:

634

80

241

325

722

39

605

590

523

$$\begin{array}{r} 63 \\ - 24 \\ \hline \end{array}$$

$$\begin{array}{r} 53 \\ + 27 \\ \hline 80 \end{array}$$

$$\begin{array}{r} 361 \\ + 229 \\ \hline \end{array}$$

$$\begin{array}{r} 513 \\ + 92 \\ \hline \end{array}$$

$$\begin{array}{r} 532 \\ - 291 \\ \hline \end{array}$$

$$\begin{array}{r} 703 \\ + 19 \\ \hline \end{array}$$

$$\begin{array}{r} 431 \\ + 92 \\ \hline \end{array}$$

$$\begin{array}{r} 763 \\ - 129 \\ \hline \end{array}$$

$$\begin{array}{r} 163 \\ + 162 \\ \hline \end{array}$$

2

Solve the following problems:

$$\begin{array}{r} 47 \\ + 35 \\ \hline \end{array}$$

$$\begin{array}{r} 176 \\ - 139 \\ \hline \end{array}$$

$$\begin{array}{r} 47 \\ + 52 \\ \hline \end{array}$$

$$\begin{array}{r} 314 \\ + 216 \\ \hline \end{array}$$

$$\begin{array}{r} 435 \\ + 56 \\ \hline \end{array}$$

$$\begin{array}{r} 761 \\ - 290 \\ \hline \end{array}$$

$$\begin{array}{r} 274 \\ - 169 \\ \hline \end{array}$$

$$\begin{array}{r} 473 \\ + 231 \\ \hline \end{array}$$

$$\begin{array}{r} 371 \\ - 27 \\ \hline \end{array}$$

$$\begin{array}{r} 530 \\ - 219 \\ \hline \end{array}$$

$$\begin{array}{r} 35 \\ + 74 \\ \hline \end{array}$$

$$\begin{array}{r} 171 \\ + 52 \\ \hline \end{array}$$

تابعنا على صفحتنا على الفيسبوك
www.facebook.com/ZakroolySite

1

Complete:

- 1) If $38 + 62 = 100$, So $100 - 62 = \dots\dots\dots$
- 2) If $621 + 243 = 864$, So $864 - 621 = \dots\dots\dots$
- 3) If $300 - 50 = 250$, So $300 - 250 = \dots\dots\dots$
- 4) If we start from number 93 on the number line and make 7 hops forward, we will reach number. $(\dots\dots\dots)$
- 5) If we start from number 88 on the number line and make 9 hops backward, we will reach number. $(\dots\dots\dots)$
- 6) If $710 - 36 = 674$. So $710 - 674 = \dots\dots\dots$
- 7) $\dots\dots\dots = 70 + 12$
- 8) $7 + 20 + 200 = \dots\dots\dots$
- 9) $832 = 2 + 30 + \dots\dots\dots$
- 10) If $98 - 10 = 88$. So $98 - 11 = \dots\dots\dots$

2 Complete using fact family:

$$17 + 23 = 40$$

$$\dots + \dots = \dots$$

$$\dots - \dots = \dots$$

$$\dots - \dots = \dots$$

$$56 + 13 = 69$$

$$\dots + \dots = \dots$$

$$\dots - \dots = \dots$$

$$\dots - \dots = \dots$$

$$40 + 27 = 67$$

$$\dots + \dots = \dots$$

$$\dots - \dots = \dots$$

$$\dots - \dots = \dots$$

$$90 + 60 = 150$$

$$\dots + \dots = \dots$$

$$\dots - \dots = \dots$$

$$\dots - \dots = \dots$$

3 Find the result using number line:

$$64 + 7$$

$$85 + 9$$

$$94 - 9$$

4 Subtract:

$$\begin{array}{r} 64 \\ - 27 \\ \hline \end{array}$$

$$\begin{array}{r} 63 \\ - 29 \\ \hline \end{array}$$

$$\begin{array}{r} 74 \\ - 18 \\ \hline \end{array}$$

$$\begin{array}{r} 274 \\ - 126 \\ \hline \end{array}$$

$$\begin{array}{r} 305 \\ - 132 \\ \hline \end{array}$$

$$\begin{array}{r} 612 \\ - 209 \\ \hline \end{array}$$

$$\begin{array}{r} 746 \\ - 529 \\ \hline \end{array}$$

$$\begin{array}{r} 367 \\ - 172 \\ \hline \end{array}$$

$$\begin{array}{r} 681 \\ - 329 \\ \hline \end{array}$$

$$\begin{array}{r} 632 \\ - 519 \\ \hline \end{array}$$

$$\begin{array}{r} 409 \\ - 268 \\ \hline \end{array}$$

$$\begin{array}{r} 511 \\ - 199 \\ \hline \end{array}$$

5 Find the sum:

$$97 + 39 = \dots\dots\dots$$

$$64 + 29 = \dots\dots\dots$$

$$276 - 127 = \dots\dots\dots$$

$$364 - 129 = \dots\dots\dots$$

$$567 - 392 = \dots\dots\dots$$

$$246 + 196 = \dots\dots\dots$$

$$371 - 325 = \dots\dots\dots$$

$$584 - 266 = \dots\dots\dots$$

$$319 + 199 = \dots\dots\dots$$

$$656 - 429 = \dots\dots\dots$$

6

Life problems:

- 1) Hind saved 295 pounds. She spent 69 pounds.
How much money left with Hind?

The money left =

- 2) 78 school boys and 109 school girls went on a school trip.
How many students went in all?

The total =

- 3) 385 passengers were on a train. 137 passengers got out in one stop.
How many passengers left on the train?

Passengers left =

- 4) The government organized a vaccination campaign for children. On the first day, 253 children were vaccinated and 129 children on the second day.
How many children vaccinated in all?

Number of children =

Lesson (101)

Fractions Half - Third and Fourth

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Create halves, thirds, and fourths of circles.
- Identify equal and unequal parts of a whole.

Learn:

Equal and Unequal parts

Whole circle

2 equal parts,
The parts are
the same size.

2 unequal parts,
the parts are not
the same size.

Circle the figures with the equal parts and cross out the figures with the unequal parts:

Halves

1 out of 2 equal parts shows one half.

Each of 2 equal parts of a whole is a half

One half

Find the figures that are divided into two equal parts, then colour the half:

Fraction:

Each part of a whole is called **fraction**.

Fourths

1 out of 4 equal parts shows one fourth or quarter.

Each of 4 equal parts of a whole is a fourth.

One fourth

Find the figure that is divided into four equal parts, then colour a fourth of the figure:

Thirds

1 out of 3 equal parts shows one third.

Each of 3 equal parts of a whole is a third.

One third

Find the figures that are divided into three equal parts, then colour a third of each figure:

تابعنا على صفحتنا على الفيسبوك

www.facebook.com/ZakroolySite

Activities

1 Match the shaded part to its name:

half

fourth

third

2 Colour the given part:

third

fourth

1 whole

half

Lesson (102)

Fractions 2

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Use appropriate vocabulary to describe fractions.
- Investigate the attributes of halves, fourths and thirds.

Remember and learn more ($\frac{1}{2}$ / $\frac{1}{3}$ / $\frac{1}{4}$)

$\frac{1}{3}$ One third

$\frac{1}{4}$ One fourth

$\frac{1}{2}$ One half

A whole

Notice:

1 out of 2 equal parts = $\frac{1}{2}$ (one over two)

1 out of 3 equal parts = $\frac{1}{3}$ (one over three)

1 out of 4 equal parts = $\frac{1}{4}$ (one over four)

Match:

$\frac{1}{3}$

One fourth

$\frac{1}{4}$

One third

$\frac{1}{2}$

One half

Numerator / Denominator

1

2

Numerator → is the **top** number of the fraction

Fraction bar → is a **line** in between the numerator and the denominator

Denominator → is the **bottom** number of the fraction

Learn:

↪ The numerator → tells us how many parts we are **focusing** on.

↪ The denominator → tells us the number of the total parts of the fraction

↪ In the fraction $\frac{1}{2}$, we have one part (numerator) of 2 equal parts (**Denominator**)

Activities

1

Write the numerator and the denominator of each fraction:

The fraction	The numerator	The denominator
$\frac{1}{2}$
$\frac{1}{3}$
$\frac{1}{4}$
$\frac{1}{5}$

2 Complete the table:

Fraction in pictures and numbers	$\frac{1}{2}$ $\frac{1}{2}$		
Number of equal parts	2
Fraction in words	Half Halves
The numerator	1
The denominator	2

3 Colour the fraction that looks like the clock:

Lesson
(103)

Fractions 3

Outcomes

Students will:

- Participate in calendar math activities.
- Investigate fractions with a numerator greater than 1.
- Make connections between images of fractions and fraction names.

3

Write the fraction:

4

Complete:

تابع جديد زاكروولي على موقعنا
<https://www.zakrooly.com>

- a) I am a fraction. My numerator is 2 and my denominator is 4.
- b) I am a fraction. My numerator is 1 and my denominator is 3.

5

Colour the given fraction:

 $\frac{2}{3}$  $\frac{2}{4}$  $\frac{1}{2}$  $\frac{3}{3}$  $\frac{3}{4}$  $\frac{1}{4}$  $\frac{4}{4}$  $\frac{2}{2}$

6

Follow the directions below then complete:

1) Shade **one part** of the circle,
then write the fraction

.....
—
.....

2) Shade **two-parts** of the circle,
then write the fraction

.....
—
.....

3) Shade **two-parts** of the circle,
then write the fraction

.....
—
.....

4) Shade **one part** of the circle,
then write the fraction

.....
—
.....

Lesson
(104)

Fractions 4

Outcomes

Students will:

- Participate in Calendar Math activities.
- Identify multiple ways to divide a rectangle into fractional parts.
- Make connections between images of fractions and fraction names.

1 Match the similar fractions:

(Halves)

تابعنا على صفحتنا على الفيسبوك

www.facebook.com/ZakroolySite

Each part of the previous shapes is one of two
 $\frac{1}{2}$ equal parts, each one represents

Note

The two pieces are not mirror images of one another but if we cut the pieces out, we will be able to fit them together.

(Thirds)

(Fourths)

2

Write the name of each fraction:

3

Colour the given fraction:

 $\frac{2}{3}$  $\frac{3}{4}$  $\frac{1}{2}$  $\frac{1}{3}$  $\frac{1}{4}$  $\frac{2}{4}$  $\frac{1}{3}$  $\frac{1}{2}$  $\frac{1}{2}$  $\frac{2}{4}$  $\frac{3}{4}$  $\frac{2}{4}$

4

Colour, and learn:

- The one whole in brown
- The halves in green
- The thirds in yellow
- The fourths in blue

Denominator 4

$\frac{1}{3}$ $\frac{2}{3}$ $\frac{3}{4}$

Lesson (106)

Fractions 6

Outcomes

Students will:

- Participate in Calendar Math activities.
- Identify numbers as even or odd.
- Name all fractional parts for halves, thirds, and fourths.

1

Colour as the given fraction:

 $\frac{1}{4}$
 $\frac{1}{3}$
 $\frac{1}{2}$

206

Math / Chapter (5) - Lesson (106)

Colour the parts that represents the denominator in green if it is an odd number, and colour the numerator in blue if it is an even number:

Lesson (107)

Fractional parts of a set

1

Outcomes

Students will:

- Participate in Calendar Math activities.
- Identify and write fractional parts of a set.
- Compare fractions of a whole and of a set.

You can name parts of a group with a fraction

Activities

1 Use color to show each fraction and complete the sentence:

 $\frac{1}{3}$

1 out of the 3 is red.

$\frac{1}{3}$ of the  is red.

 $\frac{1}{2}$

... out of the ... is red.

... of the  is red.

 $\frac{1}{4}$

... out of the.... is red
... of the  is red

 $\frac{1}{3}$

... out of the.... is red
... of the  is red

2

Use  color to show each fraction:
 $\frac{1}{2}$

 $\frac{1}{4}$

 $\frac{1}{3}$

 $\frac{2}{4}$

 $\frac{2}{3}$

 $\frac{3}{4}$

3

Write the fraction:

4

Match:

5

Complete:

210

Math / Chapter (5) - Lessons (107)

6

Write the fraction:

$$\frac{3}{4}$$

$$\frac{\dots}{\dots}$$

$$\frac{\dots}{\dots}$$

$$\frac{\dots}{\dots}$$

$$\frac{\dots}{\dots}$$

$$\frac{\dots}{\dots}$$

Lesson (108)

Fractional parts of a set

2

Outcomes

Students will:

- Participate in Calendar math activities
- Identify fractions of a set of objects.
- Write fraction questions about a set of objects.

Look at each set and answer the questions:

1) What fraction of the flowers is red?

2) What fraction of the flowers is blue?

3) What fraction of the flowers is red and blue?

1) What fraction of the bikes is red?

2) What fraction of the bikes is blue?

3) What fraction of the bikes is red and blue?

1) What fraction of the soccer balls is big?

2) What fraction of the soccer balls is small?

3) What fraction of the soccer balls is colored?

1) What fraction of the apples is red?

2) What fraction of the apples have leaves?

3) What fraction of the apples is green?

1) What fraction of the birds is blue?

2) What fraction of the birds is pink?

3) What fraction of the birds have eyes?

1) What fraction of the pizzas has mushroom?

2) What fraction of the pizzas has cheese?

3) What fraction of the pizzas has no mushrooms?

Lesson (109)

Solving story problems involving fractions of a whole or a set

Outcomes

Students will:

- Participate in Calendar Math activities.
- Solve story problems involving fractions of a whole or a set.
- Evaluate their progress in learning about fractions.

1

Cross out the 2 parts that do not match the clue:

4 friends share a . Each gets an equal share. **How would you cut it?**

2 Solve the following problems:

In your fruit basket, there are 4 pieces of fruit, 3 of them are apples.

How can we express the number of apples as a fraction ?

Hind divided her pizza into four equal parts. She gave her young sister one part of them. How can we represent the left parts in a fraction form?

The left fraction is of a pizza.

Sara rode her bike for $\frac{1}{4}$ of a mile on Monday and $\frac{2}{4}$ of a mile on Tuesday. How can we represent the left in a fraction form?

The left fraction is of mile.

Amany ate a half of an apple, then she ate $\frac{1}{4}$ of the same apple. How can we represent what she ate as a fraction?

She ate of the apple.

Lesson (110)

Flags and fractions

Outcomes

Students will:

- Participate in Calendar Math activities.
- Partition rectangles into three or four equal parts.
- Demonstrate understanding that each fractional part of a rectangle is part of a whole.
- Describe equal parts of a whole using fraction vocabulary.

Activities

1

Complete:

The Egyptian flag has equal parts.
Each part is..... out of parts.
Each part represents —

2

Use your colours and make your own flags with different colours:

Review on Chapter (5)

1

Write the name of each fraction:

.....

—

.....

.....

—

.....

.....

—

.....

.....

—

.....

.....

—

.....

.....

—

.....

.....

2

Color the fractions:

 $\frac{2}{4}$  $\frac{2}{3}$  $\frac{1}{2}$  $\frac{3}{4}$  $\frac{1}{3}$  $\frac{1}{2}$

3

Match:

 $\frac{1}{3}$  $\frac{1}{4}$  $\frac{3}{4}$  $\frac{1}{2}$ 

220

Math / Review on Chapter (5)

4

Write the name of each fraction:

5

Color the fractions:

نفوقه في أي عمل عليه العلامة ري

6

Choose the correct answer.

1

The fraction which numerator is 2 and denominator is 3 is

 $\left[\frac{2}{3} / \frac{1}{3} / \frac{1}{4} \right]$

2

One part of 3 equal parts is

 $\left[\frac{2}{3} / \frac{1}{3} / \frac{1}{4} \right]$

3

The coloured part in  is
 $\left[\frac{2}{4} / \frac{1}{3} / \frac{1}{4} \right]$

4

The shape that represents $\frac{1}{3}$ is
 $\left[\text{Circle with 1/3 shaded} / \text{Circle with 1/2 shaded} / \text{Circle with 1/4 shaded} \right]$

5

 $\frac{1}{3}$ is greater than $\left[\frac{1}{4} / \frac{1}{2} / \frac{2}{3} \right]$

6

If you cut a picture into 4 equal parts and one part of it is lost, so the left fraction is

 $\left[\frac{2}{3} / \frac{1}{3} / \frac{3}{4} \right]$

222

Lesson (111)

Bar Graphs / Pictograph

Outcomes

Students will:

- Participate in Calendar Math activities.
- Interpret data in bar graphs with a scale of 5 or 10.
- Interpret data in pictographs with a scale of 2 or 5.
- Explain why it is important to use an appropriate scale when creating graphs.

Remember

A bar graph is a chart that uses bars (or columns) to show data.

Complete using the previous bar graph:

The number of birds is, the number of butterflies is ...

The number of bees is, the number of cats is

- ★ How many total animals are in the garden?
- ★ Which animal has the least number?
- ★ Which animal has the most number?

Remember

A pictograph is another way to show data. It uses pictures to tell "How many".

From the previous pictograph and its key, answer the questions:

- How many students like picture books best?
- How many students like coloring books best?
- How many students like animal books best?
- How many students like cartoon books best?
- Which kind of books is liked the most?
- Which kind of books is liked the least?

Activities

1 Look at the data in the bar graph and answer the questions:

- 1) How many students prefer Monday?
- 2) How many students prefer Saturday and Thursday?
- 3) How many more students prefer Friday than Thursday?
- 4) What is the most popular day in this graph?

2 Look at the data in the pictograph and answer the questions:

Sports balls sold in a week

- 1) How many basketballs are sold in a week?
- 2) How many tennis balls are sold in a week?
- 3) How many fewer basketballs are sold than footballs?
- 4) What is the total number of sold balls in a week?

3 Using the previous pictograph, complete this bar graph:

4 Look at the data in the graph and answer the questions below:

- 1) How many pupils like oranges?
- 2) How many pupils like apples and bananas?
- 3) How many more pupils like bananas than dates?
- 4) How many pupils were asked about their favorite fruit?
- 5) What is the least popular fruit on this graph?

5

Look at the data in the pictograph and answer the questions below:

Favorite Pizza Toppings

Green papers

Cheese

Olives

Mushrooms

- How many people liked cheese and green peppers?
.....
- How many fewer people liked mushrooms than olives?
.....
- How many people liked cheese, green peppers and olives?
.....
- How many more people liked cheese than green peppers?
.....
- What is the most kind of pizza topping on this graph?
.....

6

Complete using the previous pictograph:

Kind	Green papers	Cheese	Olives	Mushrooms
Number				

Lesson (112)

Making bar graph from a story

Outcomes

Students will:

- Participate in Calendar Math activities.
- Organize four categories of data into a bar graph.
- Choose an appropriate scale based on the data being graphed.
- Create and solve put-together, compare, and take-apart problems using data.

1

Mariam did a survey in her class about their favorite sports. 20 students like football, 15 students like basketball, 5 students like tennis and 10 students like volleyball. Make a bar graph using the data from the story.

Be sure to include a (title, labels, scale, and colored bars).

Write three questions about the graph and then answer them:

- 1- Answer:
- 2- Answer:
- 3- Answer:

2 Lora made a survey about the favorite color for some friends; **20** of them prefer red, **10** blue, **15** green and **5** oranges. Use the data to make a bar graph and suggest some questions about the data, then answer them

1-.....

Answer:

2-.....

Answer:

Lesson (113)

Making a pictograph from a story

Outcomes

Students will:

- Participate in Calendar Math activities.
- Organize four categories of data into a pictograph.
- Choose an appropriate scale based on the data being graphed.
- Create and solve put-together, compare, and take-apart problems using data.

➤ Dalia tried to count the number of students who ate pizza during the week. She recorded 9 on Monday, 6 on Tuesday, 5 on Wednesday, 20 on Thursday and 8 on Friday. Make a pictograph to represent this survey, then suggest questions and answer them.

Title (.....)

Day	Number
Monday
Tuesday
Wednesday
Thursday
Friday

Key:.....

1 -

Answer:

2 -

Answer:

3 -

Answer:

Fares asked his friends about their favorite animal, 10 like cats, 15 like dogs, 7 like birds and 6 like fish. Make a pictograph to represent these data, then suggest questions and answer them.

Title (.....)

Lesson (114)

Real-world arrays

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Identify real-world arrays.
- Write repeated addition sentences for arrays.
- Calculate the total number of objects in arrays.

Rows: 3

Columns: 4

3 by 4 array

The number of eggs:

$$4 + 4 + 4 = 12 \text{ (according the rows)}$$

$$3 + 3 + 3 + 3 = 12 \text{ (according the columns)}$$

We can name the array by looking at how many rows **-(3)-** and columns **-(4)-** the array has.

We can also write addition sentences for arrays.

$$4 + 4 + 4 = 12 \text{ or } 3 + 3 + 3 + 3 = 12$$

Rows: 2

Columns: 3

2 by 3 array

The number of eggs:

$$3 + 3 = 6 \text{ (according the rows)}$$

$$2 + 2 + 2 = 6 \text{ (according the columns)}$$

Lesson
(115)

Human Array

Outcomes

Students will:

- Participate in Calendar Math activities.
- Collect arrays with given rows and columns.
- Write a repeated addition sentence to express the total number of objects in an array.

Remember

3

by

4

Number of rows

Number of columns

3 by 4 means that 3 is repeated 4 times $3 + 3 + 3 + 3 = 12$

Using the grid, represent the arrays and write the addition sentences:

4 by 3

The addition sentence:

.....

5 by 3

The addition sentence:

.....

Activities

1 According the grid, write the shown array and the addition sentence:

Array

..... by

The addition sentence

.....

Array

..... by

The addition sentence

.....

Array

..... by

The addition sentence

.....

Array

..... by

The addition sentence

.....

2 Complete as the example:

a) Building No.1

Array: 2 by 2

Addition sentence: $2 + 2$

Total windows: 4

b) Building No.2

Array: by

Addition sentence: +

Total windows:

c) Building No.3

Array: by

Addition sentence: +

Total windows:

d) Building No.4

Array: by

Addition sentence: +

Total windows:

3 Complete:

1 3 by 2
 $3 + 3 = 6$

2 6 by 3
.....

3 9 by 3
.....

4 10 by 3
.....

5 8 by 2
.....

6 4 by 7
.....

7 4 by 4
.....

8 5 by 2
.....

9 5 by 4
.....

10 6 by 2
.....

11 3 by 3
.....

12 7 by 2
.....

4 Match each array with the suitable shape and addition sentence:

$4 + 4 + 4$

$5 + 5$

2

$3 + 3$

5 by 2

4 by 3

3 by 2

2 by 1

Lesson (116)

Adding and subtracting large numbers using mental math strategies

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Add and subtract 1-, 2-, and 3-digit numbers.
- Apply a variety of strategies to solve problems.
- Identify and correct errors in their work and the work of others.

1 Add $56 + 57$ (using decomposing)

تفوقه في أي عمل عليه العلاءة ري

2 Add $412 + 319$

Add:

$$247 + 376$$

$$45 + 67$$

3 Subtract $72 - 28$ (using decomposing)

$$72 - 28 = \dots$$

$$72 - 20 = 52$$

$$52 - 2 = 50$$

$$50 - 6 = 44$$

We can

decompose

4 Subtract $285 - 157$

$$285 - 100 = 185$$

$$185 - 50 = 135$$

$$135 - 5 = 130$$

$$130 - 2 = 128$$

Use a suitable strategy to solve the following problems:

1) $56 - 39$

.....
.....
.....

2) $94 - 56$

.....
.....
.....

3) $76 - 39$

.....
.....
.....

4) $82 - 67$

.....
.....
.....

Find the result:

1) $84 + 69$

.....

2) $261 + 327$

.....

3) $93 - 67$

.....

4) $256 + 341$

.....

5) $313 + 269$

.....

6) $437 - 119$

.....

7) $265 - 119$

.....

8) $621 + 359$

.....

Lessons
(117-120)

Writing story problems and solving them

Outcomes

Students will:

- Participate in Calendar Math Activities.
- Add and subtract 2- and 3-digit numbers.
- Write story problems for addition and subtraction equations.
- Apply a variety of strategies to solve addition and subtraction story problems.

Notice

Addition words: total number - total sum
- addition result

Subtraction words: difference - less than -
more than - left - spent - taken - gave

Example 1

Write a story problem for the problem $42 + 36$ and get the sum.

The story problem: The number of students in our class is 42 students and the number of students in my brother's class is 36.

What is the total number of students?

The total number: $42 + 36 = 78$ students

Example 2

Write a story problem for the problem $52 - 13$ and get the **difference**.

The story problem: My father gave me **52** pounds; I spent **13** pounds of them.

How many pounds are left?

Pounds left: $52 - 13 = 39$ pounds

Activities

Make more story problems:

$$34 + 40$$

$$86 + 95$$

$140 - 65$

$230 - 157$

$509 - 256$

$347 + 256$

$218 + 257$

Review on Chapter (6)

1

Find the result:

تابع جديد ذاكرولى على موقعنا
<https://www.zakrooly.com>

$$\begin{array}{r} 791 \\ + \\ 192 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 726 \\ + \\ 214 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 245 \\ + \\ 316 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 276 \\ + \\ 132 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 476 \\ - \\ 295 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 524 \\ - \\ 234 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 760 \\ - \\ 553 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 726 \\ - \\ 352 \\ \hline \end{array}$$

.....

2

Find the result, using mental math strategies:

$$341 - 30 = \dots\dots\dots$$

$$462 + 30 = \dots\dots\dots$$

$$517 + 340 = \dots\dots\dots$$

$$739 + 200 = \dots\dots\dots$$

$$596 - 201 = \dots\dots\dots$$

$$671 - 99 = \dots\dots\dots$$

$$687 - 178 = \dots\dots\dots$$

$$531 - 199 = \dots\dots\dots$$

$$369 - 169 = \dots\dots\dots$$

$$761 + 198 = \dots\dots\dots$$

3 Match the arrays to the addition sentences:

$$7 + 7 + 7$$

4 by 4

$$2 + 2 + 2$$

3 by 2

$$5 + 5$$

2 by 3

$$4 + 4 + 4 + 4$$

5 by 2

$$3 + 3$$

7 by 3

4 Color according to the arrays below:

3 by 5

4 by 4

3 by 2

2 by 5

4 by 3

6 by 2

5 Complete the bar graph, then answer the questions below:

50 pupils like football, 30 pupils like basketball,
5 pupils like tennis and 10 pupils like volleyball

Vertical scale

volleyball

Title

Horizontal scale

Favorite sport

- a) What is the most popular sport to pupils?
- b) What is the least popular sport to pupils?
- c) How many more pupils like basketball than volleyball?
.....
- d) Suggest a question, then answer it.
.....?

Answer:

6 Look at the following pictograph, then answer the questions below:

The following pictograph shows how many flowers picked in 5 days.

Picked flowers

Saturday	       
Sunday	   
Monday	     
Tuesday	   
Wednesday	   

- How many flowers were picked on **Saturday**?
.....
- How many flowers were picked on **Tuesday**?
.....
- How many flowers were picked on **Sunday** and **Wenesday** together?
.....
- How many flowers were picked on **Saturday** and **Sunday**?
.....
- What is the day with the most picked flowers?
.....
- What is the day with the least picked flowers?
.....

General Revision

1

Choose the correct answer:

a) 3 fourths =

 $(\frac{2}{3} / \frac{1}{2} / \frac{3}{4})$

b) The fraction that represents the shaded

part  is = $(\frac{1}{4} / \frac{1}{3} / \frac{1}{2})$ c) Two thirds is written as = $(\frac{2}{4} / \frac{1}{3} / \frac{2}{3})$ d) $423 + 127 = \dots\dots\dots$ $(550 / 540 / 530)$ e) $476 + 200 = \dots\dots\dots$ (even / odd) number.

2

Put the suitable sign ($<$, $>$, $=$):a) $5 + 50 + 500$

555

b) 639

 $600 + 40$ c) $437 - 122$ $576 - 249$

d) 7 hundreds and 3 tens

 $70 + 300$ e) 

3 Find the result:

$$\begin{array}{r} 619 \\ - 97 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 432 \\ - 17 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 450 \\ + 170 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 700 \\ + 13 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 163 \\ - 24 \\ \hline \end{array}$$

.....

$$\begin{array}{r} 776 \\ - 77 \\ \hline \end{array}$$

.....

4 Complete:

a) In the pattern 3, 5, 7, 9,, the rule is

b)  The array is by

c) 1 part of 4 equal parts represents

d) The addition sentence of the array 4 by 2 is

5 Hana has LE 426 and his brother Samy has LE 184.
Find the total sum.

The total = + = pounds

6

Complete:

a) The even number between 14 and 18 is

b) The estimation of $432 + 276$ is

c) $4 + 4 + 4 + 4 + 4$ is the addition sentence of the array by

d) 47, 57, 67,,

e)  the shaded ball represents 

7

Subtract mentally:

$$99 - 10 = \dots\dots\dots$$

$$99 - 20 = \dots\dots\dots$$

$$99 - 40 = \dots\dots\dots$$

$$99 - 9 = \dots\dots\dots$$

$$99 - 8 = \dots\dots\dots$$

$$546 - 99 = \dots\dots\dots$$

$$761 - 101 = \dots\dots\dots$$

$$576 - 100 = \dots\dots\dots$$

$$366 - 300 = \dots\dots\dots$$

$$567 - 60 = \dots\dots\dots$$
